My dear Deane, Providence, Nov 20, 1909

I do not wonder you did not understand the term "college fracture". So Mrs Bailey had given it me naturally thinking it a surgical outgrowth of football! It turns out, however, to be College fracture, a term known to surgeons & signifies a fracture of the radius (I think) at the wrist, to be precisely what happened to her left arm last year. Now it is the right, She resumed her Potter work on Thursday - but has an awful cold and should be in bed, Today - my dentist discovered that tooth was in horrid condition & I am again suffering more than I can bear. Even an anodyne does not relieve me, May wrote she would be glad not - but me think she had better not come, what is done watching the bulletins of the deadly game. Those who do not die in the game die off to Gulf while watching it on the gridiron or at the ticker. Too much pork for a Shilling - I think,

Love Gratefully Lena Bailey
