

Touisset, Mass

August 24, 1912

My dear Deane,

Will you kindly tell
me what this queer thing is,
with its winged stems, scorpionid
spikes, properly colyx & small white
deciduous colyx? I've no glass bot-
ter than a common pocket dissector
here & cannot with that get at ovary.
Moreover, I've no key for any thing
xcept Gray's Manual & the Gardner
Botany on hand. My first idea
- suggested by Stache which happens
to be on my table - was something
of the Armeria kind, but the stem
and leaves threw me off that notion.

The plant was handed me by
a non-botanist - who sent for seed
at random has had all kinds
of things turn up, when you & Rand
come down - Soon, I'll show you
that garden. This one is now
lovely. With best regards to your

blessed wife, I am

P.S. Don't catch Ever Friday there
me napping again Bailey
as you did on Goshen,

Malvaceae Scrophulariaceae

1912.

SOCIETY FOR THE PROTECTION OF NATIVE PLANTS.

LEAFLET NO. 22.

I am most heartily in sympathy,
with the plan for protecting our wild
flowers, and the green laurel of the
Massachusetts hills. We have no
right to rob those who will come after
us of such things as these. I some-
times feel when I see the poor, wintry
leafless bunches of May flowers sold
along our city streets in Spring, that
I should like, at least, to limit every-
body to a single flower and the leaves
that belong to it, and to help promote
a serious society for that purpose.

Melissa Jewett

For more Leaflets apply to Miss M. E. Carter, Boston Society of Natural History, Boston.

Bailey, William Whitman. 1912. "Bailey, William Whitman Aug. 24, 1912."
