

I have just found time to go over my package of Nova Scotian
Plants - and arrange in manual order - awaiting study. The few - very
few grasses & sedges, I am sending to you - No doubt they are of the common
species - You know I know nothing about those groups - If of any interest
to you I keep them. You may like at least to look them over. If I had had
a little more time, I would have written the labels you are waiting for -
By the way - please give me back data as I dealt with what you say is ~~the~~
~~the~~ Daphne Mezereum - I do not find that I have any of the plant in
my bundle - but may come across it later - but at present I have
nothing from which to write your label. Have you Liphiola from
anywhere? I'm sorry I cannot be at next Club meeting -
An important meeting of C.R.S. will prevent -
As ever R.A.W.
