

Townshend Vt. Nov 27th
1912

Mr. Walter Dean,

Dear Sir!—

I am much interested in your article in the October "Rhodora" relating to the fruiting of *Euphorbia Cypharissiae*. I am surprised to learn that it is sparing of its fruit, though I have never given the matter special thought I am used to seeing it in flower and, I supposed, fruit and never took particular notice further.

My own specimens were collected in flower or early fruit June 23, 1911. Is it possible that the flower is abortive? I do not infer so from your article.

If a single sheet could be mailed with safety and you care to examine it I would be glad to send my

my specimens to you for examination
and if you wish I will try and look
up the matter more thoroughly next
season.

Respectfully

Lester A. Wheeler

Poulsbooth Vermont

Wheeler, Leston A. 1912. "Wheeler, Leston Ansel Nov. 27, 1912." *Walter Deane correspondence*
