Coq de roche du Perou.

Buff. ois. 4. p. 437.

Museum Leverianum 1. p. 15. pl. 4.

This rare and beautiful bird is a native of Peru and Surinam, and is remarkable for the singular conformation of its crest and tail-coverts. It is generally seen in the neighbourhood of rocks and caverns, and is about the size of a small pigeon. The female differs from the male in being entirely of a brown colour.
