in which are given numerous recipes for
the preparation of breads and cakes, and
for the making of pastries, etc. The book
is a valuable one for the baker and
the cook.

THE
APPENDICULATED SHARK.

GENERIC CHARACTER.

Mouth situated beneath the anterior part of the head, with numerous teeth disposed in rows.

Spiracles on each side the neck, in most species five in number.

Body oblong, somewhat cylindric.

SPECIFIC CHARACTER, &c.

Brown SHARK, with pale subocellated spots, and mouth fringed on each side with cutaneous appendages.

Watt's SHARK.

Phillips's Voyage to Botany Bay, p. 285.

This species is considered as one of the smallest of its genus, the specimens hitherto observed, having rarely exceeded the length of three feet. It is a native of the Antarctic seas.
