POPULAR INFORMATION

JAMAICA PLAIN, MASS.

JULY 19, 1916

Summer-flowering shrubs. The flowers of many shrubs can now be seen in the Arboretum, and others will appear almost constantly until the late autumn or early winter when the Witch Hazels carry the period of blooming into another year. The last of the Azaleas the two white-flowered species of eastern North America, *Rhododendron* (*Azalea*) *arborescens* and *R.* (*Azalea*) *viscosum*, are now in bloom. A mass of the former can be seen on the right-hand side of the Valley Road in front of the Hickories, and *Rhododendron* (*Azalea*) *viscosum* can be seen in quantity on both sides of the Meadow Road. Azaleas of different species have been flowering continuously in the Arboretum since the middle of May, and the blooming of no other group of plants extends here over such a long period although that of the Viburnums and Cornels is almost as long.

Rhododendron maximum. This native species is the last of the *Rhododendrons* with evergreen leaves to bloom, and it can now be seen on the left-hand side of the road entering by the South Street gate. This is one of the hardiest of all *Rhododendrons* in this climate and no other species which can be successfully grown here has such large and handsome leaves. The flowers are handsome in their delicate colors but are a good deal hidden by the young branchlets which make their growth before the buds open.

Rosa Jackii. This beautiful Rose was introduced into the Arboretum from Korea several years ago by Mr. J. G. Jack for whom it is named. It is one of the Multiflorae Roses and has long stems which lie flat on the ground, lustrous foliage and pure white flowers in wide many-flowered clusters. The flowers have the delicate fragrance of the Musk Rose. The hybridizer should be able to find in it a good subject

1916. "Rhododendron maximum." *Bulletin of popular information - Arnold Arboretum, Harvard University* 2(13), 49–49. <https://doi.org/10.5962/p.320570>.
