of the other Mountain Ashes in the collection. This tree is growing with other species of *Sorbus* on the right-hand side of the path leading into the Shrub Collection from the Forest Hills Gate.

***Berberis diaphana*.** In the early days of November no Barberry in the Arboretum equals this Chinese species in the brilliancy of its scarlet leaves. It is a low, broad, compact, round-topped shrub with small leaves which appear very late in the spring, usually solitary but large, pale yellow flowers and large oblong red fruits. The beauty, however, of this plant is chiefly found in its habit and in the color of the leaves in late autumn. There is a plant of this Barberry in the Shrub Collection and others in the supplementary Barberry Collection on Hickory Path near Centre Street.

***Crataegus Boyntonii*.** This small tree, which is a native of the Appalachian foothills from southwestern Virginia to Alabama, and one of the largest of the *Intricatae* Group, is well worth a place in collections of these plants for the brilliant orange and red colors of the leaves at this time. It has large flowers in few-flowered clusters, yellow anthers and nearly globose yellow-green fruit flushed with red which is still to be found on the plant in the Arboretum where it can be seen among the other *Intricatae* on the lower side of the road at the eastern base of Peter's Hill.

***Crataegus Buckleyi*.** This is another arborescent species of the *Intricatae*, which inhabits mountain slopes from two thousand to three thousand feet elevation from southwestern Virginia through western North Carolina to eastern Tennessee. It has flowers in more compact clusters than those of *C. Boyntonii*, rose-colored anthers, and sub-globose, red or russet-red fruit. The leaves of this little tree turn as brilliantly as those of the last named species near which it is growing.

An illustrated guide to the Arboretum containing a map showing the position of the different groups of plants has recently been published. It will be found useful to persons unfamiliar with the Arboretum. Copies of this guide can be obtained at the Administration Building in the Arboretum, from the Secretary of the Massachusetts Horticultural Society, 300 Massachusetts Avenue, Boston, from The Houghton, Mifflin Company, 4 Park Street, Boston, and at the office of the Harvard Alumni Bulletin, 50 State Street, Boston. Price, 30 cents.

The subscription to these Bulletins is \$1.00 per year, payable in advance.
