SIMIA LEONINA.

CHARACTER GENERICUS.

Dentes primores utrinque quatuor, approximati.

Laniarii solitarii, longiores, hinc remoti.

Molares obtusi.

CHARACTER SPECIFICUS, &c.

Simia fusco-olivacea, albido undulata, humeris floccosis, facie auribus pedibusque atris, naso albo.

Simia leonina. S. ex olivaceo fuscescens, facie atra, ore albo, dorso striis albo flavescens, notato.

Humb. Voy. Obs. Zool. &c.

Simiam leoninam, in America australi inferiore et calidiore generatam, primus descripsit celeberrimus Humboldt. A rostri apice ad initium caudæ longitudo est quasi septuncialis. Eodem fere utitur vivendi modo quo cæteræ parvulæ simiæ. Color ex olivaceo fuscescit; variantur tamen superiores partes striis seu undulis albescentibus. Cauda totius animalis longitudini æqualis est.

W. W.

THE
LEONINE MONKEY.

GENERIC CHARACTER.

Front-Teeth in each jaw four, placed near together.

Canine-Teeth solitary, longer than the others, distant from the grinders.

Grinders obtuse.

SPECIFIC CHARACTER, &c.

Brownish-olive Monkey, with whitish undulations, with long-haired shoulders, black face, ears and feet, and white nose.

Le Leoncito.

Humb. et Bonpl. Voy. Obs. Zool. &c.

This very small species of Monkey, which measures about seven inches from the tip of the nose to the beginning of the tail, is an inhabitant of the lower and hotter parts of South America, and was first described by the celebrated traveller Mons. Humdoldt. In its manners it resembles the rest of the smaller Monkies. Its colour is a brownish-olive, slightly waved or varied with whitish streaks on the upper parts; and the tail is of equal length with the rest of the animal.
