

Additions to the Lichen of the Huron Mountain Club

William R. Manierre¹

My recent article on the "Bryophytes and Lichens of the Huron Mountain Club" (1999) lists 280 lichen species as having been found within the boundaries of this protected holding in Marquette County of Michigan's western Upper Peninsula. The present note adds 35 taxa to this total. Seventeen of these represent my own findings as part of the original, ongoing project during the year subsequent to completion of the article.

Of the remaining 18 species, six were collected by Henry A. Imshaug [*] in 1949 and 12 by his student, James Malachowski [#] in 1976. These are deposited at MSC, with the exception of *Melanelia elegantula* (Zahlbr.) Essl. and *Phaeophyscia erythrocardia* (Tuck.) Essl., which are at MICH.

The original nomenclature remains here as it appears in Dr. Alan M. Fryday's forthcoming "Checklist of Lichens and Allied Fungi of Michigan," which is soon to appear in the *Contributions from the University of Michigan Herbarium*. It is through Dr. Fryday's manuscript that I first learned of the Imshaug and Malachowski collections at the Huron Mountain Club. Their contributions help to raise the total of lichens found there to 315.

Acrocordia megalospora (Fink) R.C. Harris

Aspicilia cinerea (L.) Korber

#*Baeomyces rufus* (Hudson) Repent.

Biatora vernalis (L.) Fr.

Buellia arnoldii Servit & Nadv.

Cladonia sobolescens Nyl. ex Vainio

#*Collema pulchellum* Ach.

Cyphelium lucidum (Th.Fr.) Th. Fr.

Fuscopannaria leucophaea (Vahl) P.M. Jorg.

#*Lecanora carpinea* (L.) Vainio

#*L. cateilea* (Ach.) A. Massal.

L. strobilina (Sprengel) Kieffer

L. symmicta (acxh.) Ach.

Lepraria caesioalba (de Lesd.) J.R. Laundon

#*Leptogium milligranum* Sierk

#*Loxospora elatina* (Ach.) A. Massal.

Megaspora verrucosa (Ach.) Hafellner & V. Wirth

**Melanelia elegantula* (Zahlbr.) Essl.

¹Huron Mountain Wildlife Foundation, Big Bay, Michigan 49808

- #*M. fuliginosa* (Fr. ex Duby) Essl.
M. subolivacea (Nyl.) Essl.
 #*Peltigera degenii* Gyelnik
 **Pertusaria consocians* Dibben
 **Phaeophyscia erythrocardia* (Tuck.) Essl.
 #*Physcia subtilis* Degel.
 **Polychidium muscicola* (Sw.) Gray
 **Psora globifera* (Ach.) A. Massal.
 #*Ramalina dilacerata* (Hoffm.) Hoffm.
 #*R. obtusata* (Arnold) Bitter
 **Rhizocarpon grande* (Flörke ex Flotow) Arnold
R. obscuratum (Ach.) A. Massal.
Rinodina archaea (Ach.) Arnold
R. dakotensis H. Magn.
Staurothele fissa (Taylor) Zwackh.
 #*Stereocaulon subcoralloides* (Nyl.) Nyl.
Tuckermannopsis sepincola (Ehrh.) Hale
Xanthoparmelia cumberlandia (Gyelnik) Hale
 "narrow-leaved form" (Irwin M. Brodo)

Acknowledgements. My thanks to Irwin M. Brodo, John W. Thomson, Clifford M. Wetmore, Richard C. Harris, and Howard A. Crum for help in identifying species and for general support and encouragement.
