In my revision of Australian *Euphrasia* (Barker 1982) *Euphrasia tasmanica* Gandoger was reduced to synonymy under *E. collina* R.Br. Although many subspecies were formally recognised within the species, a putative race including the type of this name was given the informal designation *E. collina* ssp. '*tasmanica*'.

While the separation of glandular-hairy lowland Tasmanian populations into four subspecies is not entirely satisfactory and warrants closer study, a formal name for the subspecies is desirable as it usefully caters for variants not coming under other taxa. The combination is formalised here.
