gone, and in about a minute the skin was drawn off the lips—the toad had eaten its own skin, and there it stood with its new covering as bright as if it had been fresh varnished. I endeavoured to touch it, to feel if it was clammy, but the creature gave a vigorous jump, and the soil adhered to its legs. I looked at it in an hour afterwards; it had then begun to resume its dingy brown colour. The time it took to get off its head-dress was only a few minutes. It appeared to me that each time its jaw opened it drew the skin forward, while it distended the body on the side to be uncovered. W. TURNER.—*Gardeners' Chronicle*, Mar. 1850.
