995. *On the Application of Trinomial Nomenclature to Zoology.* By Dr. Elliot Coues. *Ibid.*, July, 1884, pp. 241-247.—Dr. Coues's address on this subject before National Academy of Sciences in Washington, April, 1884.

996. *Sabine's Gull in Dublin Bay.* By J. J. Dowling. *Ibid.*, Dec. 1884, p. 490.—A specimen in the first year's plumage was taken at Cloutarf, Nov. 5, 1884.

997. *The American Killdeer Plover in Cornwall.* By Thomas Cornish. *Ibid.*, IX, March, 1885, p. 113.—A specimen of *Ægialitis vociferus* shot at Tresco, in the Scilly Islands, Jan. 15, 1885.

998. *Reported Occurrence of the Blue-winged Teal near Redcar.* By T. H. Nelson. *Ibid.*, p. 113.—A specimen previously recorded (*Zoologist*, 1882, p. 92) by the same writer as *Querquedula discors* proves to have been a young Garganey (*Q. circia*).

999. *Notes on Birds of Manitoba.* By Robert Miller Christey. *Ibid.*, April, 1885, pp. 121-133.—Interesting field notes on about 45 species.

1000. *Notes on the Zoology of Manitoba.* By the late T. B. Wood. (Communicated by J. H. Nelson.) *Ibid.*, June and July, 1885, pp. 224-227, 241-247.—Extracts from letters to Mr. Nelson, giving various interesting notes.

1001. *Bartram's Sandpiper . . . in Cornwall.* By H. E. Dresser. *Ibid.*, p. 232.—Record of a specimen shot "as already recorded in the 'Zoologist,'" several years previously on the cliffs near Coverack.

1002. *Discovery of the Eggs of the Knot, Tringa canutus.*—By J. E. Harting. *Ibid.*, Sept. 1885, p. 344.—Referring to Dr. C. Hart Merriam's record in 'The Auk' (II, p. 312), and stating that "Sabine found the Knot breeding in abundance on Melville Island" in 1820, and that "Capt. Lyons found it breeding near Quilliam Creek, Melville Peninsula," in 1823. Reference is also made to Sir John Richardson's reporting "the Knot as breeding in Hudson's Bay, and down to the 55th Parallel," etc.

GENERAL NOTES.

Kirtland's Warbler from the Straits of Mackinac.—In a lot of birds sent me by William Marshall, Esq., keeper of the light-house on Spectacle Reef, Michigan, is a male specimen of Kirtland's Warbler (*Dendroica kirtlandi*). It killed itself by striking the light at that place on the night of May 21, 1885. Found with it, dead at the foot of the tower, were *Turdus mustelinus*, *Dendroica blackburniæ*, *D. maculosa*, *Siurus auricapillus*, *Passerculus savanna*, and *Tringa minutilla*. Spectacle Reef is in the western part of Lake Huron near the Straits of Mackinac, midway between the north and south shores.—C. HART MERRIAM, *Locust Grove, N. Y.*

1885. "Publications Received." *The Auk* 2, 375–376.
