'Bulletin No. 14' of the Biological Survey, entitled 'Laws Regulating the Transportation and Sale of Game.' It has been prepared by Dr. T. S. Palmer, in charge of the immediate supervision of matters relating to game under the Lacey Act, with the assistance of Mr. H. W. Olds. It forms a pamphlet of about ninety pages, with nine maps and diagrams, showing the open and close seasons for various kinds of game in the different States, etc. The pamphlet consists of (1) a general discussion of legislation regulating seasons, shipment, and sale (pp. 11-44), and (2) a digest of Federal and State laws regulating transportation and sale of game. Thus in a small and convenient compass may be found, clearly arranged, every kind of information desired respecting the protection afforded game animals, game birds, and non-game birds in any part of the United States. It represents a vast amount of labor, with results of the highest importance to all interested in any way in the protection, capture, sale, and transportation of game, and of millinery supplies derived from wild birds.—J. A. A.
