Recibido el 26-III-2003. Aceptado el 5-VII-2003

ABSTRACT

Among the biological material collected during the 1998-2001 "INVEMAR-Macrofauna" campaigns aboard the R/V Ancón along the upper zone of the continental slope of the Colombian Caribbean, at depths ranging from 200 to 520 m, a total of 104 gastropod species were obtained. Besides 18 not yet identified species, but including one recently described new species (*Armina juliana* Ardila and Díaz, 2002), 48 species were not previously known from Colombia, 18 of which were also unknown from the Caribbean Sea. Of the 36 families represented, Turridae was by far the richest in species (26 species). An annotated list of the taxa recorded is provided, as well as illustrations of those recorded for the first time in the area.

RESUMEN

Entre el material biológico colectado en 1998-2001 durante las campañas "INVEMAR-Macrofauna" a bordo del B/I Ancón, a profundidades entre 200 y 520 m, se obtuvo un total de 104 especies de gasterópodos. Aparte de 18 especies cuya identificación no ha sido completada, pero incluyendo una especie recientemente descrita (*Armina juliana* Ardila y Díaz, 2002), 48 especies no habían sido registradas antes en aguas colombianas y 18 de ellas tampoco en el mar Caribe. De las 36 familias representadas, Turridae fue la más numerosa en especies (26 especies). Se ofrece una relación anotada de las especies colectadas, así como ilustraciones de aquellas que se registran por primera vez para el área.

KEY WORDS: Gastropoda, shelf slope, Colombia, Caribbean Sea.

PALABRAS CLAVE: Gastropoda, talud continental, Colombia, Mar Caribe.

INTRODUCTION

Knowledge of the composition and distribution of the gastropod fauna in the coastal and shelf areas of northern South America has considerably increased in

the course of the past three decades, mostly based on material collected in the littoral zone and shallow shelf areas less than 100 m in depth (e.g. ALTENA, 1975;

* Instituto de Investigaciones Marinas y Costeras, INVEMAR, Cerro Punta de Betín, Santa Marta, Colombia.
E-mail: agracia@invemar.org.co

PETUCH, 1981, 1987; PRINZ, 1982; COSEL, 1986; JONG AND COOMANS, 1988; DÍAZ AND GÖTTING, 1988; DÍAZ, 1985, 1989, 1990, 1994, 1995; DÍAZ AND PUYANA, 1994). By contrast, most records of gastropod species from deeper settings off the northernmost South American coasts are based on the material trawled by the R/V Pillsbury (cf. BAYER, VOSS AND ROBINS, 1970; BAYER, 1971) in certain areas off the Colombian coast and the R/V Nisshinmaru № 201 off Surinam (cf. OKUTANI, 1982, 1983). We can thus say that the molluscan fauna from deeper shelf zones and the continental slope in this region, like that of many other areas of the Caribbean, remained so far under-explored. The fact that almost all of the about 740 gastropod species known from Curacao, Bonaire and Aruba, and 630 of the 722 species recorded from the Colombian Caribbean (cf. Diaz and Puyana, 1994) have been recorded exclusively from water depths ranging from intertidal to 100 m (cf. JONG AND COOMANS, 1988), demonstrates this situation eloquently. Thus, a significant increase of ca. 20% in the current inventory of gastropod species occurring in Colombian Caribbean waters can be expected when exhaustive collecting in deeper zones is carried out in this area (cf. DÍAZ, CANTERA AND PUYANA, 1998).

Between 1998 and 2001, a series of cruises were conducted aboard the R/V Ancón of the Instituto de Investigaciones Marinas y Costeras, INVEMAR, along the upper shelf slope (-200 to -520 m) off the Caribbean mainland coast of Colombia, as part of an ambitious program for inventorying the benthic macrofauna of this under-explored zone. The purpose of this paper is to report the gastropod species collected during these campaigns, many of which have not been recorded from Colombian or even from Caribbean waters before.

MATERIAL AND METHODS

During the cruises, 80 stations were sampled between the Guajira Peninsula ($12^{\circ}34'N$ - $71^{\circ}50'W$) and the Gulf of

Urabá ($09^{\circ}02'N$ - $76^{\circ}02'W$), ranging in depth from 200 to about 520 m (Fig. 1). A bottom area of about 25,000 m² was swept at each station using a semi-balloon trawl net (ca. 9 x 1 m mouth opening, 20 min. trawling at a speed of about 3 knots). The material collected was preliminarily sorted by groups and preserved in 70% ethanol on board.

Taxonomic identification was carried out at INVEMAR, Santa Marta, and the U.S. National Museum of Natural History, Washington D.C. Voucher specimens of the collected material were deposited in the Museo de Historia Natural Marina de Colombia, at Santa Marta, Colombia. The taxonomic arrangement follows VAUGHT (1989). Taxa recorded for the first time for Caribbean or Colombian waters are illustrated. Shell measurements of the largest specimen of each taxa are given.

RESULTS

Family FISSURELLIDAE Flemming, 1822

Cornisepta acuminata (Watson, 1883)

(Fig. 2)

References:

Puncturella (Fissurisepta) triangulata: DALL, 1889: 404.

Puncturella (F.) acuminata: PÉREZ-FARANTE, 1947: 145, pl. 64, figs. 1-3.

Material: One living specimen, INV MOL2385 (L. 7.24, W. 5.45, H. 5.07 mm), St. 03; 450 m.

Previous Colombian records: None

Figure 1. Location of the stations where material was collected along the continental shelf slope of the Colombian Caribbean.

Figura 1. Localización de las estaciones de colecta de material a lo largo del talud de la plataforma continental del Caribe colombiano.

Distribution: South Carolina, Georgia, Louisiana, Mexico, Puerto Rico: Culebra Island (DALL, 1889; PÉREZ-FARFANTE, 1947; ODÉ, 1988) and northernmost Colombian coast; depth range 291-713 m.

Remarks: This record extends the distribution range of the species to the southern Caribbean. The shell features of the Colombian specimen are consistent with those of the holotype (USNM 61236) of *P. triangulata* Dall, 1889.

Cranopsis granulata (Seguenza, 1863)
(Fig. 3)

References:

Puncturella (*Puncturella*) *watsoni*: DALL 1889: 403-404.

Puncturella (*Cranopsis*) *granulata*: PÉREZ-FARFANTE, 1947: 124-126, pl. 54, figs. 4-7. *Puncturella granulata*: RIOS, 1994: 24, fig. 47.

Material: One living specimen, INV MOL1649 (L. 4.36, W. 2.95, H. 2.65 mm), St. 30; 270 m.

Previous records in Colombia: None

Distribution: Florida Keys, Mexico, Cuba, Barbados, Brazil (DALL, 1889; PÉREZ-FARFANTE, 1947; RIOS, 1994), Colombia; depth range 150-1935 m.

Diodora sayi (Dall, 1889)

References:

Fissurella alternata var. *sayi*: DALL, 1889: 407.

Diodora sayi: PÉREZ-FARFANTE, 1943: 8-9, pl. 3, figs. 1-8.

Diodora sayi: DÍAZ AND PUYANA, 1994: 110, fig. 330.

Diodora savi: RIOS, 1994: 26, fig. 59.

Material: One empty shell, INV MOL1724 (L. 11.85, W. 7.13, H. 4.3 mm), St. 33; ca. 285 m.

Previous records in Colombia: DÍAZ AND PUYANA (1994), northernmost Colombian coast.

Distribution: North Carolina, Florida, Texas, Puerto Rico, Panama, Colombia, Curacao, Cuba, Barbados to extreme southern Brazil (WARMKE AND ABBOTT, 1962; ESPINOSA, 1984; DÍAZ AND PUYANA, 1994); depth range 15-1449 m.

Remarks: The shell features of the Colombian specimen are consistent with those of the paralectotype of *F. alternata* var. *sayi* (USNM 95158, off Havanna, Cuba, 144 m).

Diodora tanneri (Verrill, 1882) (Fig. 4)

References:

Diodora tanneri: PÉREZ-FARFANTE, 1943: 19-20, pl. 6, figs. 12-14.

Diodora tanneri: OKUTANI, 1983: 237 + fig.

Material: One living specimen, INV MOL1650 (L. 35.86, W. 25.32, H. 13.99 mm), St. 24; one empty shell, INV MOL1652, St. 32; 480-520 m.

Previous records in Colombia: None.

Distribution: Delaware, Virginia, North Carolina, Georgia, Mexico, Cuba, Barbados, Surinam (PÉREZ-FARFANTE, 1943; ESPINOSA, 1984; OKUTANI, 1983), Colombia; depth range 180-730 m.

Remarks: The shell features of the Colombian specimen are consistent with those of the type material of *Fissurella tanneri* Verrill, 1883 (USNM 43765, off Delaware Bay, 187 m).

Family ACMAEIDAE Carpenter, 1857 *Pectinodonta arcuata* Dall, 1882 (Fig. 5)

References:

Pectinodonta arcuata: DALL, 1889: 411, pl. 25, figs. 3-3a, b.

Pectinodonta arcuata: OLSSON, 1971: 87-88.

Pectinodonta arcuata: ABBOTT, 1974: 34, fig. 185.

Material: 23 living specimens and empty shells, INV MOL1653 (L. 19.59, W. 13.99, H. 12.88 mm), 1654-1659, 2600-2602, St. 30, 32-34, 36; 260-520 m.

Previous records in Colombia: None.

Distribution: Cuba, St Lucia, St. Thomas, Guadeloupe, Dominica, St. Vincent, Nicaragua (DALL, 1889;

OLSSON, 1971; ABBOTT, 1974), Colombia; depth range 260-1067 m.

Remarks: This record extends the distribution range of the species to the southern Caribbean. The shell features of the Colombian specimens were compared and are consistent with those of material from diverse localities deposited in the NMNH (USNM 801799-800, 95094 (syntype), 126810 (syntype), 888703, 811804).

Family PSEUDOCOCCULINIDAE Hickman, 1983

Notocrater youngi McLean and Harasewych, 1995 (Fig. 6)

Reference:

Notocrater youngi: MCLEAN AND HARASEWYCH, 1995: 26-27, figs. 66-69.

Material: One living specimen, INV MOL1660 (L. 3.14, W. 2.57, H. 1.33 mm), St. 39; 300 m.

Previous records in Colombia: ARDILA AND HARASEWYCH (2002).

Distribution: Bahamas (type locality), (MCLEAN AND HARASEWYCH, 1995), Colombia; depth range 300-518 m.

Notocrater houbricki McLean and Harasewych, 1995 (Fig. 7)

Reference:

Notocrater houbricki: MCLEAN AND HARASEWYCH, 1995: 24-26, figs. 58-65.

Material: Two living specimens INV MOL2364 (L. 1.8, W. 1.3 H. 1 mm), 2603, St. 33; 270 m.

Previous records in Colombia: ARDILA AND HARASEWYCH (2002).

Distribution: Bahamas: Grand Bahama Island (MCLEAN AND HARASEWYCH, 1995), Colombia; depth range 270-412 m.

Copulabyssia sp. (Fig. 8)

Material: Three specimens, INV MOL2366, 2367 (L. 3.6, W. 2.6 H. 1.7 mm), 2616, St. 11, 33; 270-300 m.

Previous records in Colombia: ARDILA AND HARASEWYCH (2002).

Distribution: Colombia (Southern Caribbean).

Remarks: *Copulabyssia* sp. differs morphologically from the other five species allocated in this genus and reviewed by

LEAL AND SIMONE (2000). This apparently unnamed species is the first member of the genus known for the Caribbean. Its description is in process.

Family COCCULINIDAE Dall, 1882
***Coccocrater portoricensis* (Dall and Simpson, 1901) (Fig. 9)**

References:

Coccocrater portoricensis: DALL AND SIMPSON, 1901: 440-441, pl. 53, figs. 18-19.

Coccocrater portoricensis: DÍAZ AND PUYANA, 1994: 113, fig. 344.

Coccocrater portoricensis: MCLEAN AND HARASEWYCH, 1995: 17, fig. 50.

Material: Six specimens, INV MOL1686 (L. 11.62, W. 8.59, H. 3.71 mm), 1685, 1687, 1689; St. 35, 33; 286-321 m.

Previous records in Colombia: ARDILA AND HARASEWYCH (2002).

Distribution: Puerto Rico (DALL AND SIMPSON, 1901), Colombia (DÍAZ AND PUYANA, 1994); depth range 286-558 m.

Remarks: The morphological features of the Colombian specimens are consistent with those of the holotype (USNM 160496, Puerto Rico). However, the periostracum in the rediscovered material differs from the eroded holotype. Its redescription and a new nomenclatural combination is in process.

***Cocculina emsoni* McLean and Harasewych, 1995 (Fig. 10)**

Reference:

Cocculina emsoni: MCLEAN AND HARASEWYCH, 1995: 13, figs. 25-35.

Material: 34 living specimens, INV MOL2320 (L. 3.88, W. 2.27, H. 1.53 mm), INV MOL2604, St. 15, 33; 270-302 m.

Previous records in Colombia: ARDILA AND HARASEWYCH (2002).

Distribution: Off New Providence Island, Bahamas (type locality), (MCLEAN AND HARASEWYCH, 1995), Colombia; depth range 270-518 m.

Remarks: This record extends the geographic range of the species considerably to the southernmost Caribbean. The morphological features of the Colombian specimens are consistent with those of the holotype (USNM 860355).

***Cocculina messingi* McLean and Harasewych, 1995 (Fig. 11)**

Reference:

Cocculina messingi: MCLEAN AND HARASEWYCH, 1995: 11-13, figs. 12-14.

Material: +40 specimens, INV MOL1661-1663, 1664 (L. 5.45, W. 4.05, H. 1.78 mm), 1665, 2321-2327, 2605, 2606, St. 09, 11, 14, 15, 16, 21, 39, 30, 29; 260-504 m.

Previous records in Colombia: ARDILA AND HARASEWYCH (2002).

Distribution: Bahamas (type locality) (MCLEAN AND HARASEWYCH, 1995), Colombia; depth range 260-504 m.

***Cocculina rathbuni* Dall, 1882**

Reference:

Cocculina rathbuni: DALL, 1889: 347, pl. 25, figs. 5, 7, 7a.

Cocculina rathbuni: DÍAZ AND PUYANA, 1994: 113, fig. 345.

Cocculina rathbuni: MCLEAN AND HARASEWYCH, 1995: 8-10, figs. 2-5.

Material: +30 specimens, INV MOL1673 (L. 6.55, W. 4.85, H. 1.79 mm), 1666-1674, 2611, 2612, 3243, 3324, 3431, 3432, 3467, 3510, St. 11-16, 28, 29, 31, 34, 35, 39; 290-519 m.

Previous records in Colombia: DALL (1889); ARDILA AND HARASEWYCH (2002).

Distribution: Massachusetts, Bahamas, Martinique, St. Vincent, Barbados, Colombia (DALL, 1889; DÍAZ AND PUYANA, 1994; MCLEAN AND HARASEWYCH, 1995); depth range 124-1127 m.

Remarks: The morphological features of the Colombian specimens are consistent with those of the lectotype (USNM 126807, Martinique) and the paralecotype (USNM 333750, Barbados).

***Cocculina* sp. 1 (Fig. 12)**

Material: +70 specimens, INV MOL1677-1679 (L. 10.9, W. 8.9, H. 3.3 mm), 2607-2610, 2891, 3124, 3168, 3260, 3339, 3379, 3433, 3480, 3497, St. 07, 09, 11, 13, 14, 15, 16, 19, 26, 33, 35, 39.

Previous records in Colombia: ARDILA AND HARASEWYCH (2002).

Distribution: Colombia (Southern Caribbean); depth range 200-488 m.

Remarks: This, apparently unnamed species, differs from *C. rathbuni* and *C. messangi* in its shell sculpture and the radular features. Its description is in process.

***Cocculina* sp. 2 (Fig. 13)**

Material: Eight specimens, INV MOL2370, 2371 (L. 3.2, W. 2.2, H. 1.2 mm), 2613, 2614, St. 52; 504 m; INV MOL2613, 2614, St. 32, in 500 m.

Previous records in Colombia: ARDILA AND HARASEWYCH (2002).

Distribution: Colombia (Southern Caribbean).

Remarks: This, apparently unnamed species, differs from another congeneric species occurring in the Western Atlantic in its sculpture of raised radial ribs and the radular features. Its description is in process.

***Fedikovella beanii* (Dall, 1882) (Fig. 14)**

References:

Cocculina beanii: DALL, 1889: 347-348, pl. 25, figs. 2, 4, 8.

Fedikovella beanii: MCLEAN AND HARASEWYCH, 1995: 19-21, figs. 51-57.

Material: Three living specimens and three shells, INV MOL2372 (L. 4.2, W. 2.5, H. 2.2 mm), 2615, St. 32; 500-516 m.

Previous records in Colombia: ARDILA AND HARASEWYCH (2002).

Distribution: New Jersey Guadeloupe, Martinique, St. Vincent, Barbados

(DALL, 1889; MCLEAN AND HARASEWYCH, 1995), Colombia; depth range 210-1049 m.

Family TROCHIDAE Rafinesque, 1815

***Calliotropis lisoconca* (Dall, 1881) (Fig. 15)**

References:

Margarita lisoconca: DALL, 1881: 41-42.

Solariella lisoconca: DALL, 1889: 381, pl. 21, figs. 8-8a.

Material: Nine living specimens and empty shells, INV MOL1690 (L. 4.81, W. 4.03, AL. 2.25 mm), 2328-2333, 2618, St. 03, 07, 11, 12, 16, 27, 67; 274-500 m.

Previous records for Colombia: QUINN (1979), off the Guajira Peninsula.

Distribution: Louisiana, Florida, Gulf of Mexico, Colombia (DALL, 1881; QUINN, 1979); at depths ranging from 250 to 600 m.

Remarks: The shell features of the Colombian specimens are consistent with those of the holotype (USNM 214282, Louisiana, 596 m) of *M. lisoconca* Dall, 1881. This record extends the geographic range of the species to the southernmost Caribbean.

Material: Two living specimens, INV MOL1715 (L. 10.36, W. 14.27, AL. 6.86 mm), 1716; St. 33; 269-321 m.

Previous records for Colombia: None.

Distribution: Cuba, Virgin Islands, Lesser Antilles, North Brazil (DALL, 1881; CLENCH AND ABBOTT, 1943a; RIOS, 1994), Colombia; depth range 66-1170 m.

Remarks: The shell features of the Colombian specimens were compared and are consistent with those of material from various localities deposited in the NMNH (USNM 431008, 431009, 94989). This record extends the range of the species to the southernmost Caribbean.

Solariella lubrica (Dall, 1881) (Fig. 17)

References:

Margarita lubrica: DALL, 1881: 44.

Margarita (Solariella) lubrica var. iridea: DALL, 1889: 382, pl. 21, figs. 9-9a.

Solariella lubrica: RIOS, 1994: 36, fig. 109.

Material: 28 living specimens and empty shells, INV MOL1717, 1718 (L. 5.03, W. 4.08, AL. 3.2 mm), 1719-1723, 2334-2337; St. 18, 09, 11, 21, 27, 26, 36, 35, 33; 269-500 m.

Previous records for Colombia: None.

Distribution: Florida, Texas, Cuba, St. Lucia, South Brazil (DALL, 1881; RIOS,

1994; BULLIS, 1956a; QUINN, 1979), Colombia; depth range 73-1450 m.

Remarks: The shell features of the Colombian specimens are consistent with those of the lectotype (USNM 95061, Cuba, 1450 m). This is the first record for the species in the southern Caribbean.

Family SKENEIDAE Thiele, 1929

Parviturbo sp. (Fig. 18)

Material: One living specimen, INV MOL1726 (L. 3.28, W. 3.63, AL. 2.69 mm.), St. 35.

Previous records for Colombia: None.

Distribution: Colombia; depth range 286-310 m.

Remarks: According to the shell features of the specimen collected, we didn't hesitate to place it in the genus *Parviturbo*, but they are not at all consistent with those of other known Caribbean species. Further material and an exhaustive revision of literature would be necessary for accurate identification of this species.

Family TURBINIDAE Rafinesque, 1815

Cantrainea macleani Warén and

Bouchet 1993

Reference:

Cantrainea macleani: WARÉN AND BOUCHET, 1993: 8-10, figs. 4a-c, 5b, 5f-g, 6a.

Material: One empty shell, INV MOL1696 (L. 13.45, W. 13.79, AL. 8.76 mm), St. 32; ca. 520 m.

Previous records for Colombia: WARÉN AND BOUCHET (1993), Pillsbury sta. P394.

Distribution: Louisiana, Colombia (WARÉN AND BOUCHET, 1993); depth range 421-1033 m.

Family VITRINELLIDAE Bush, 1897

Cyclostremiscus sp. (Fig. 19)

Material: Four living specimens, INV MOL1725, (L. 4.38, W. 6.28, AL. 3.19 mm; L. 4.03, W. 6.28, AL. 3.19 mm; L. 3.73, W. 5.62, AL. 3.36 mm and L. 3.26, W. 4.86, AL. 3.04 mm), St. 36.

Previous records for Colombia: None.

Distribution: Colombia; depth range, 490-500 m.

Remarks: The shell of this species exhibits a much stronger spiral sculp-

ture than any other species of *Cyclostremiscus* previously recorded in Colombian waters. We have been unable to identify this species with the available literature.

Pseudorotella cf. *cocolitoris* (Pilsbry and McGinty, 1945)

References:

Teinostoma (Ellipetylus) cocolitoris: PILSBRY AND McGINTY, 1945: 8, pl. 1, fig. 3.

Teinostoma cocolitoris: DÍAZ AND PUYANA, 1994: 133, fig. 443.

Material: Five empty shells, INV MOL1727 (L. 3.42, W. 3.75 mm, AL. 2.81 mm) 2621, 3100, 3275, St. 07, 11, 36, 032; 308-514 m.

Previous records for Colombia: DÍAZ AND PUYANA (1994), empty shell picked from beach sand near Punta Espada, Guajira Peninsula.

Distribution: North Carolina, Florida, Colombia, to central coast of Brazil (PILSBRY AND McGINTY, 1945; RIOS, 1994); depth range 18-122 m.

Remarks: Since the shell material collected is broken and rather eroded, most of the characteristic shell sculpture of the species could not be observed.

Family RISSOIDAE Gray, 1847

Microstelma gabbi (Dall, 1889) (Fig. 20)

References:

Dolophanes (Melanoides var?) gabbi: DALL, 1889: 270-271, pl. 29, fig. 7.

Crepidacella gabbi: ABBOTT, 1974: 77-78, fig. 702.

Material: One empty shell, INV MOL1728 (L. 7.35, W. 3.65, AL. 3.67 mm), St. 26; ca. 320 m.

Previous records for Colombia: None.

Distribution: St. Vincent (DALL, 1889), Colombia; depth range 320-1436 m.

Remarks: The features of the single shell collected are consistent with those of the holotype (USNM 508719, St. Vincent).

Family CERITHIIDAE Fleming, 1828

Varicopeza crystallina (Dall, 1881) (Fig. 21)

References:

Cerithiopsis (?) crystallina: DALL, 1881: 89-90.

Cerithiopsis crystallina: DALL, 1889: 254, pl. 20, fig. 3.

Cerithiopsis crystallina: DALL AND SIMPSON, 1901: 424.

Previous records for Colombia: None.

Material: +50 shells and living specimens, INV MOL1729-1736, 1737 (L. 16.52, W. 3.61, AL. 2.62 mm) 1738, 2625; St. 29, 30, 33-35, 37, 39; 260-498 m.

Distribution: Florida, Mexico, Bahamas, Cuba, Puerto Rico, Martinique, Dominica, Guadeloupe, St. Croix, Barbados (DALL, 1881; HOUBRICK, 1987), Colombia; depth range 11-1605 m.

Family CAPULIDAE Fleming, 1822

Hyalorisia galea (Dall, 1889) (Fig. 22)

Reference:

Capulus (*Hyalorisia*) *galea*: DALL, 1889: 288-298, pl. 14, fig. 3.

Material: Nine living specimens and empty shells, INV MOL1739-1742, 1743 (L. 22.74, W. 18.47, H. 6.92 mm), 1744, 2626; St. 28, 32, 34, 36; 461-520 m.

Previous records for Colombia: None.

Distribution: Louisiana, Texas, Mexico, Cuba, Barbados (DALL, 1889; ABBOTT, 1974; WARÉN AND BOUCHET, 1993), Colombia; depth range 329-768 m.

Remarks: This record extends the distribution range of the species to the southernmost Caribbean. The shell features of the collected material are consistent with those of the holotype (USNM 508724, Barbados, 392 m).

Capulus sp. (Fig. 23)

Material: +60 living specimens and shells, INV MOL1745 (L. 11.64, W. 10.92, H. 5.9 mm), 1746-1750, 2916, 2998, 3018, 3027, 3064, 3150, 3153, 3264, 3288, 3380, 3481; St. 01, 03, 04, 08, 11, 13, 15, 20, 27, 26, 24, 39; 282-505 m.

Previous records for Colombia: None.

Distribution: Colombia; depth range 282-505 m.

Remarks: The shell features of this species are not consistent with those of *C. ungaricus* (Linné, 1767), another Atlantic deep-water species of the genus, nor with other material of *Capulus* from elsewhere in the Caribbean deposited at the NMNH. A thorough revision of literature and comparison with further mate-

rial from elsewhere in the Atlantic has to be accomplished to determine the taxonomy of this species.

Family XENOPHORIDAE Troschell, 1852

Xenophora longleyi (Bartsch, 1931)

References:

Tugurium longleyi: CLENCH AND AGUAYO, 1943: 5-6, pl. 1, figs. 5-6.

Tugurium longleyi: DÍAZ AND PUYANA, 1994: 162, fig. 594.

Material: +400 shells and living specimens INV MOL1751-1757, 1758 (L. 45.05, W. 107.74 mm), 1759-1765, 2867, 2877, 2900, 2915, 2921, 2928, 2965, 3000, 3073, 3094, 3105, 3160, 3179, 3193, 3259, 3323, 3357, 3417, 3441, 3515; St. 01-18, 20, 25, 28-30, 32-38; 269-520 m.

Previous records for Colombia: BAYER ET AL. (1970), Gulf of Darién, off Isla Fuerte.

Distribution: North Carolina, South Carolina, Florida, Cuba, Barbados, Colombia, Venezuela, Surinam, South Brazil (CLENCH AND AGUAYO, 1943; BULLIS, 1956a; OKUTANI, 1983; RIOS, 1994); depth range 125-823 m.

Family OVULIDAE Fleming, 1822

Pseudosimnia vanhyningi (M. Smith, 1940) (Fig. 24)

References:

Primovula vanhyningi: RIOS, 1994: 76, pl. 25, fig. 291.

Primovula vanhyningi: SUNDERLAND AND SUNDERLAND, 1994: 14 + fig.

Material: One living specimen, INV MOL2338 (L. 13.44, W. 7.5 mm); St. 19, 200 m.

Previous records for Colombia: None.

Distribution: Florida, Louisiana, Barbados, Brazil (SMITH, 1940; RIOS, 1994), Colombia; depth range 125-200 m.

Remarks: Various octocorals, on which this species presumably feeds (CATE, 1972), were found among the material collected at this station. This record extends the distribution range of the species considerably to the southern Caribbean.

Family NATICIDAE Forbes, 1838

Polinices sp. (Fig. 25)

Material: Eight living specimens and six shells, INV MOL1766 (L. 9.27, W.

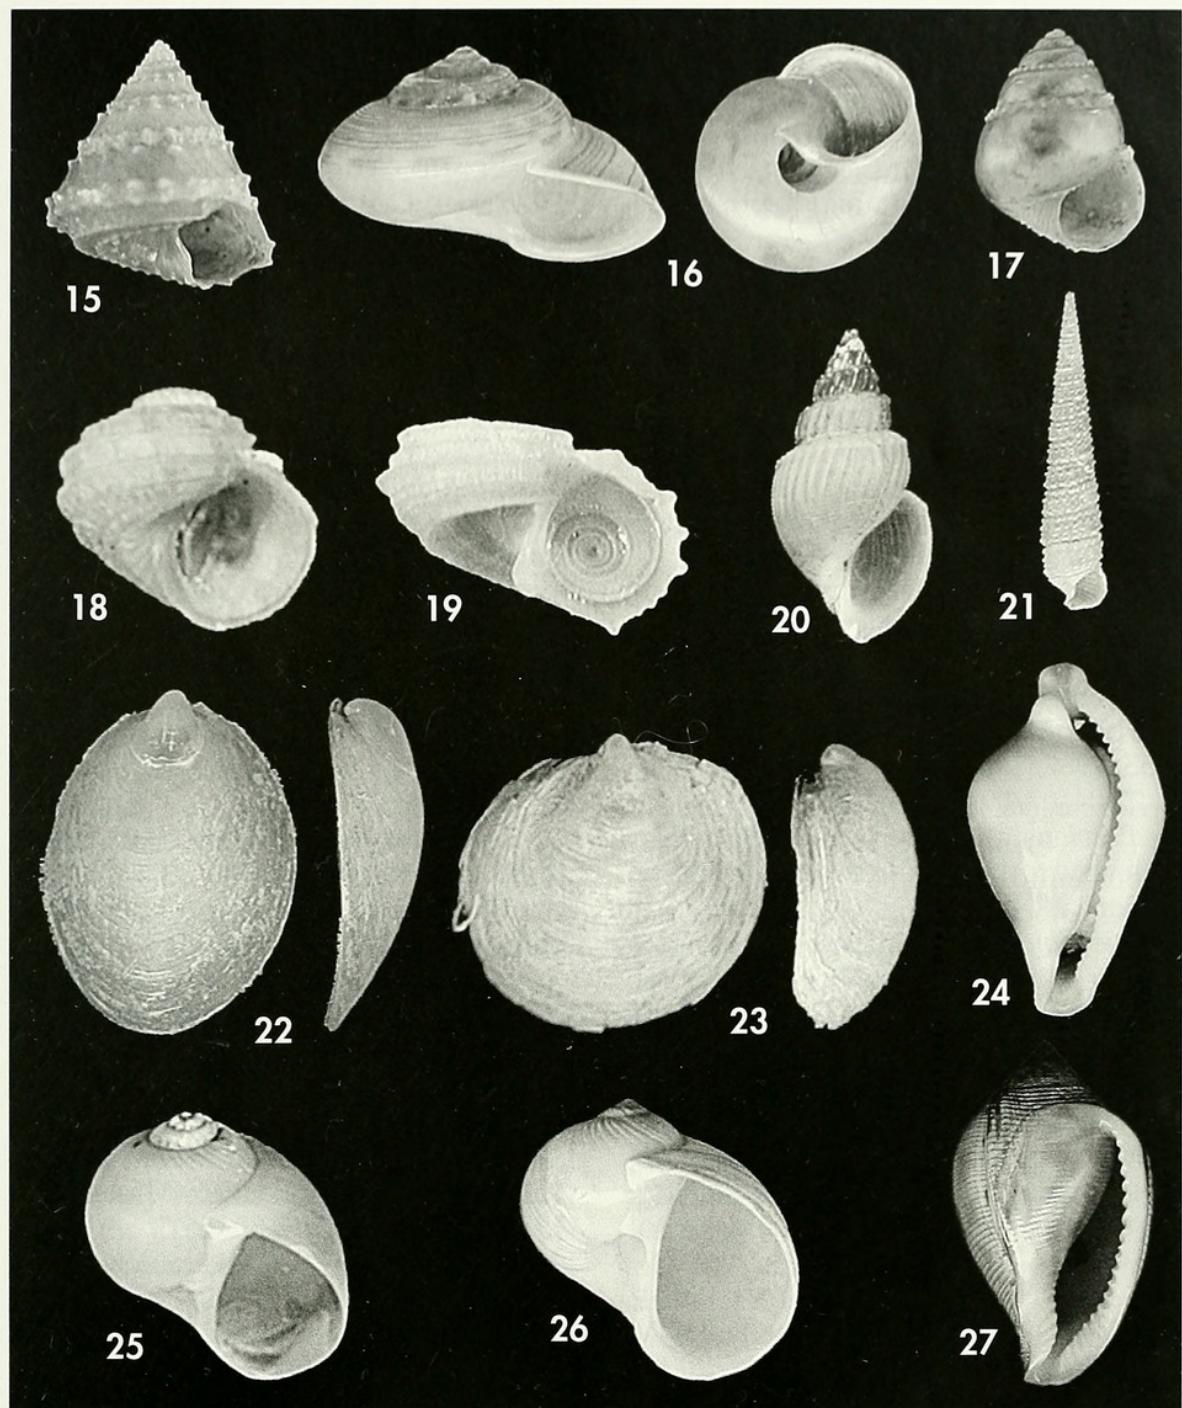

Figure 15. *Calliotropis lisocona*, L. 5.7 mm. Figure 16. *Gaza watsoni*, frontal and umbilical views, L. 9.99 mm. Figure 17. *Solariella lubrica*, L. 4.88 mm. Figure 18. *Parviturbo* sp., L. 3.28 mm. Figure 19. *Cyclostremiscus* sp., L. 3.74 mm. Figure 20. *Microstelma gabbi*, L. 7.35 mm. Figure 21. *Varicopeza crystallina*, L. 16.52 mm. Figure 22. *Hyalorisia galea*, dorsal and lateral views, L. 18.85 mm. Figure 23. *Capulus* sp., dorsal and lateral views, L. 14.0 mm. Figure 24. *Pseudosimnia vanhyningi*, L. 13.44 mm. Figure 25. *Polinices* sp., L. 11.59 mm. Figure 26. *Natica* sp., L. 9.46 mm. Figure 27. *Sconsia striata*, L. 54,58 mm.

Figura 15. *Calliotropis lisocona*, L. 5,7 mm. Figura 16. *Gaza watsoni*, vista frontal y umbilical, L. 9,99 mm. Figura 17. *Solariella lubrica*, L. 4,88 mm. Figura 18. *Parviturbo* sp., L. 3,28 mm. Figura 19. *Cyclostremiscus* sp., L. 3,74 mm. Figura 20. *Microstelma gabbi*, L. 7,35 mm. Figura 21. *Varicopeza crystallina*, L. 16,52 mm. Figura 22. *Hyalorisia galea*, vistas dorsal y lateral, L. 18,85 mm. Figura 23. *Capulus* sp., vistas dorsal y lateral, L. 14,0 mm. Figura 24. *Pseudosimnia vanhyningi*, L. 13,44 mm. Figura 25. *Polinices* sp., L. 11,59 mm. Figura 26. *Natica* sp., L. 9,46 mm. Figura 27. *Sconsia striata*, L. 54,58 mm.

7.43, AL. 6.85 mm), INV MOL1767 (L. 11.59, W. 10.48, AL. 9.3 mm), 2627, 2851, 2863, 2935, 3227, 3282, 3407, 3444; St. 02, 10, 11, 13, 14, 23, 25; 204-510 m.

Previous records for Colombia: None.

Distribution: Colombia; depth range 204-510 m.

Remarks: We have been unable to identify this species with the available literature.

***Natica guesti* Harasewych and Jensen, 1984**

References:

Natica guesti: HARASEWYCH AND JENSEN, 1984: 99-101, figs. 1-11.

Natica guesti: DÍAZ AND PUYANA, 1994: 268 + fig.

Material: Three living specimens and fourteen shells, INV MOL2813 (L. 11.55, W. 11.44, AL. 10.09 mm), INV MOL2914, 2933, 2987, 3039, 3068, 3107, 3181, 3200; St. 01-04, 07, 09, 10, 23; 206-500 m.

Previous records for Colombia: HARASEWYCH AND JENSEN (1984), NW of Riohacha.

Distribution: Mississippi, Bermuda, Puerto Rico, Jamaica, Virgin Islands, Cuba, Panama, Colombia (HARASEWYCH AND JENSEN, 1984); depth range 165-500 m.

Remarks: The shell features of the collected material are consistent with those of the holotype (USNM 765087, 201 m, St. Martin, Leeward Islands).

***Natica* sp. (Fig. 26)**

Material: Six empty shells, INV MOL1768-1772, 1773, (L. 21.26, W. 20.14, AL. 18.02 mm); St. 29, 30, 32-34.

Previous records for Colombia: None.

Distribution: Colombia; depth range 260-520 m.

Remarks: Only empty, rather eroded shells were found, so that an accurate identification of the species could not be accomplished.

***Sinum perspectivum* (Say, 1831)**

References:

Sinum perspectivum: ABBOTT: 1974: 157, fig. 1705.

Sinum perspectivum: DÍAZ AND PUYANA, 1994: 164, fig. 605.

Material: One living specimen INV MOL2814 (L. 4.72, W. 13.18 mm); St. 14; 296-304 m.

Previous records for Colombia: KAUFMANN AND GÖTTING (1970), Cartagena; DÍAZ AND GÖTTING (1988), Bahía Nenguange, near Santa Marta; DÍAZ (1989), Bahía Portete.

Distribution: New Jersey, Maryland, Virginia, North Carolina, Florida, Louisiana, Texas; Mexico, Costa Rica, Bermuda; Cuba, Cayman Islands, Jamaica, Virgin Islands, Colombia, Surinam, Brazil (ALTEA, 1975; DÍAZ AND PUYANA, 1994; RIOS, 1994); depth range 0-70 m.

Remarks: This record extends the depth range of the species to about 300 m.

Family TONNIDAE Suter, 1913

***Eudolium bairdii* (Verrill and Smith, 1881)**

Reference:

Eudolium bairdii: MARSHALL, 1992: 33-35, figs. 10-19, 22, 31-36, 38.

Material: 17 living specimens and empty shells, INV MOL1774-1776, 3535 (L. 54.16, W. 35.12 mm), INV MOL2848, 3081; St. 03, 05, 12, 17, 18, 20, 23, 24, 38; 206-500 m.

Previous records for Colombia: MARSHALL (1992): off Santa Marta.

Distribution: Atlantic, Mediterranean and Indo-Western Pacific (MARSHALL, 1992); depth range 17-823 m.

Remarks: There are several lots in the NMNH (USNM 751766, 751868 to 751882, 766104, and 878128) containing many specimens of this species collected previously in Colombian waters (Gulf of Uraba, off Santa Marta, off the Guajira Peninsula).

***Eudolium crosseanum* (Monterosato, 1869)**

References:

Eudolium crosseanum: TURNER, 1948: 178-180, pl. 75, fig. 5; pl. 81, figs. 1-2.

Eudolium crosseanum: OKUTANI, 1983: 264 + fig.

Eudolium crosseanum: MARSHALL, 1992: 25-32, figs. 1-4, 9, 20, 23-26, 37.

Eudolium crosseanum: DÍAZ AND PUYANA, 1994: 169, fig. 627.

Material: 14 empty shells and living specimens, INV MOL1777-1779, 1780 (L. 58.45, W. 37.11 mm), 1781-1783, 2868, 2889, 3010, 3028, 3130, 3138, 3364, 3462; St. 04, 08, 14, 19, 21, 26, 29, 35, 37, 39; 200-340 m.

Previous records for Colombia: DÍAZ AND PUYANA (1994), off Cabo de La Vela.

Distribution: New Jersey, North Carolina, Florida, Mississippi, Cuba, Barbados, Colombia, Surinam (OKUTANI, 1983; MARSHALL, 1992; DÍAZ AND PUYANA, 1994); depth range 17-914 m.

Family CASSIDAE Latreille, 1825

Sconsia striata (Lamarck, 1816) (Fig. 27)

References:

Sconsia striata: DALL AND SIMPSON, 1901: 419.

Sconsia striata: CLENCH AND ABBOTT, 1943b: 6-8, pl. 4, figs 1-4.

Material: One living specimen, INV MOL1784 (L. 54.58, W. 32.04, AL. 44.26 mm), St. 21; ca. 276 m.

Previous records for Colombia: None.

Distribution: Florida, Mississippi, Texas, Mexico, Bahamas, Cuba, Jamaica, Barbados, Venezuela, Brazil (DALL AND SIMPSON, 1901; BULLIS, 1956a; RIOS, 1994), Colombia; depth range 37-640 m.

Remarks: *Sconsia lindae* Petuch, 1987 is a closely related species which occurs along the Colombian Caribbean coast at depths between 20 and 80 m (PETUCH, 1987; DÍAZ AND PUYANA, 1994). Differences in shell color and sculpture between both species could be the result of ecological factors affecting shell development in shallow and deep waters respectively.

Oocorys bartschi clericus Quinn, 1980

References:

Oocorys bartschi clericus: QUINN, 1980: 156, figs. 1a; 2c, d; 7.

Oocorys bartschi clericus: DÍAZ AND PUYANA, 1994: 169, fig. 628.

Material: 23 living specimens and shells INV MOL1785-1789, 1790 (L. 81.39, W. 50.29, AL. 57.71 mm) 3101, 3235, 3309, 3425, 3451, 3452, 3509; St. 07, 10, 12, 14, 16, 25, 29, 32, 34; 290-520 m.

Previous records for Colombia: QUINN (1980), off the Guajira Peninsula, off Cartagena.

Distribution: Bahamas, Panama, Colombia (QUINN, 1980; DÍAZ AND PUYANA, 1994); depth range 290-1554 m.

Remarks: The shell features of the collected material are consistent with those of the holotype (USNM 751953, off Santa Catarina, Brazil, 731 m).

Echinophoria coronadoi (Crosse, 1867)

References:

Galeodea coronadoi: CLENCH, 1944: 4, pl. 2.

Bathygalea coronadoi: BAYER, 1971: 135-136, fig. 13.

Phalium (Echinophoria) coronadoi: DÍAZ AND PUYANA, 1994: 171, fig. 636.

Material: One living specimen INV MOL1791 (L. 97.86 mm, W. 62.28, AL. 74.77 mm); St. 21, 274-282 m.

Previous records for Colombia: BAYER (1971), off the Guajira Peninsula.

Distribution: North Carolina, Cuba, Jamaica, Colombia, Venezuela (DALL, 1889; BAYER, 1971; DÍAZ AND PUYANA, 1994); depth range 33-282 m.

Family EPITONIIDAE Berry, 1910

Sthenorystis pernobilis (Fischer and Bernardi, 1857) (Fig. 28)

References:

Sthenorystis pernobilis: CLENCH AND TURNER, 1950a: 224-226, pl. 97, figs. 1-7; pl. 107, fig. 1. *Sthenorystis pernobilis:* SMITH, 1991: 11 + fig.

Material: Two living specimens, INV MOL2339 (L. 16.17, W. 13.94, AL. 5.57 mm); St. 19; 200 m.

Previous records for Colombia: None.

Distribution: North Carolina, Florida, Bahamas, Cuba, Jamaica, Guadeloupe, Martinique, Barbados (DALL, 1889; CLENCH AND TURNER, 1950a; SMITH, 1991), Colombia; depth range 90-1600 m.

Remarks: Both specimens were found among the abundant material of ahermatipic corals obtained in this station. The shell features of the Colombian specimens were compared and are consistent with those of USNM 811653, Virgin Islands, 198-234 m.

**Family EULIMIDAE H. and A. Adams,
1854**

***Melanella jamaicensis* (C. B. Adams,
1845)**

References:

Melanella intermedia: DÍAZ AND PUYANA, 1994: 150, fig. 536.

Melanella intermedia: RIOS, 1994: 104, pl. 34, fig. 429.

Material: One shell INV MOL1792 (L. 8.57, W. 2.33, AL. 2.54 mm), one living specimen INV MOL1793 (L. 8.54, W. 2.36, AL. 2.16 mm); St. 25, 26; 314-490 m.

Previous records for Colombia: DÍAZ AND GÖTTING (1988), near Santa Marta

Distribution: From New Jersey to Texas, Bermuda, Colombia, Brazil, Argentina and Europe (DÍAZ AND PUYANA, 1994; RIOS, 1994); depth range 5-490 m.

Remarks: This is a parasitic species which is usually found attached to holothurians such as *Astichopus* sp. in the Santa Marta area (DÍAZ, 1985).

***Niso aeglees* Bush, 1885**

References:

Niso aeglees: ABBOTT, 1974: 129, fig. 1411.

Niso aeglees: DÍAZ AND PUYANA, 1994: 151, fig. 540.

Material: Three living specimens INV MOL1794, 3276 (L. 8.46, W. 3.48 mm, AL. 2.71 mm; L. 6.96, W. 2.88, AL. 2.48 mm); St. 11, 26; 308-318 m.

Previous records for Colombia: DÍAZ AND GÖTTING (1988), nearby Santa Marta; DÍAZ (1989), Bahía Portete.

Distribution: North Carolina, Florida, Texas, Mexico, Colombia, Surinam, Brazil (DÍAZ AND PUYANA, 1994; RIOS, 1994); depth range 13-318 m.

Remarks: The shell features of the collected material are consistent with those of the syntype (USNM 35862, off Cape Hatteras, 27 m).

Family MURICIDAE da Costa, 1776

***Paziella oregonia* (Bullis, 1964)**

References:

Poirieria (Paziella) oregonia: VOKES, 1970: 26, pl. 5 fig. 3.

Paziella oregonia: DÍAZ AND PUYANA, 1994: 177, fig. 666.

Poirieria oregonia: RIOS, 1994: 110-111, fig. 463.

Material: +50 shells and living specimens INV MOL2847 (L. 67.8, W. 30.6, AL. 39.2 mm), 1811, 1812, 2925, 3036, 3051, 3071, 3083, 3158, 3161, 3216, 3290, 3385, 3442, 3491; St. 01, 04-06, 09-11, 13-15, 21, 22, 24; 286-505 m.

Previous records for Colombia: DÍAZ AND PUYANA (1994), off the Guajira Peninsula.

Distribution: Colombia, Venezuela, Trinidad, French Guiana, Surinam, Brazil (VOKES, 1970; FAIR, 1976; DÍAZ AND PUYANA, 1994; RIOS, 1994); depth range 30-550 m.

***Poirieria actinophora* (Dall, 1889)**

References:

Trophon (Boreotrophon?) actinophorus: DALL, 1889: 206, pl. 15, fig. 2.

Murex (Paziella) actinophorus: BAYER, 1971: 157-161, figs. 30, 35 d.

Actinotrophon actinophorus: DÍAZ AND PUYANA, 1994: 182, fig. 685.

Material: 23 shells and living specimens INV MOL1802-1808, 1809 (L. 13.01, W. 5.22, AL. 8.2 mm), 1810, 2629, 3280, 3429; St. 11, 14, 27, 29, 30, 33, 35, 37; 260-321 m.

Previous records for Colombia: BAYER (1971), off Gulf of Morrosquillo.

Distribution: Bahamas, St. Croix, Martinique, Barbados, Panama, Colombia, Brazil, and northeast Atlantic (BAYER, 1971; RIOS, 1994; HOUART, 1996); depth range 100-774 m.

Remarks: The shell features of the collected material are consistent with those of the paralectotype (USNM 87089, Saint Croix, 446 m).

***Siratus beauii* (Fischer and Bernardi,
1857)**

References:

Murex (Murex) beauii: CLENCH AND PÉREZ-FARFANTE, 1945: 14-15, pl. 7, figs 1-2.

Siratus beauii: DÍAZ AND PUYANA, 1994: 177, fig. 664.

Chicoreus (Siratus) beauii: RIOS, 1994: 108, fig. 450.

Material: 44 living specimens and empty shells INV MOL1795-1798, 1799 (L. 143.31, W. 66.04, AL. 29.41 mm),

1800, 1801, 2628, 2921, 3049, 3050, 3080, 3137, 3155, 3159, 3301, 3376, 3440, 3490; St. 01, 04, 06, 08, 09, 11, 13-15, 26, 27, 29, 30, 33, 35; 260-505 m.

Previous records for Colombia: DÍAZ AND PUYANA (1994), off the Guajira Peninsula.

Distribution: Louisiana, Florida, Jamaica, Cuba, Lesser Antilles, Colombia, Venezuela, French Guyana, Surinam, Brazil, Uruguay (CLENCH AND PÉREZ-FARFANTE, 1945; FAIR, 1976; DÍAZ AND PUYANA, 1994; RIOS, 1994); depth range 24-505 m.

Laevityphis sp. (Fig. 29)

Material: One living specimen, INV MOL1813 (L. 8.36, W. 5.22, AL. 2.08 mm), St. 28, 510-519 m.

Previous records for Colombia: None.

Distribution: Colombia.

Remarks: The single specimen collected is in very good condition and, besides an exhaustive revision of the literature, was compared with other material of *Laevityphis* from Colombia and elsewhere in the Caribbean (at the NMNH and MHNMC). We have been unable to identify it to the species level. This may be an unnamed species, but more specimens must become available to make a description.

Siphonochelus tityrus (Bayer, 1971) (Fig. 30)

Reference:

Typhis (*Siphonochelus*) *tityrus*: BAYER, 1971: 164-166, figs. 33-34.

Material: 20 living specimens and numerous shells INV MOL1814, 1815, 1816 (L. 10.93, W. 5.57, AL. 2.8 mm), 2340-2341, 2630; St. 08, 09, 21, 26, 67; 274-326 m.

Previous records for Colombia: None.

Distribution: Venezuela, Trinidad and Tobago (BAYER, 1971), Colombia; depth range 60-326 m.

Remarks: The shell features of the collected material are consistent with those of the holotype (USNM 700005, Margarita Island, 60 m). This record extends the distribution range of the species westward along the northern South American coast.

Siphonochelus riosi (Bertsch and D'Attilio, 1980) (Fig. 31)

References:

Thyphina riosi: BERTSCH AND D'ATTILIO, 1980: 135-137, figs. 6-7.

Thyphina riosi: D'ATTILIO AND HERTZ: 1988: 67, figs. 96, a-c.

Siphonochelus (*Siphonochelus*) *riosi*: HOUART: 1994: 85, fig. 199.

Typhis riosi: RIOS, 1994: 116, fig. 490.

Material: Two empty shells, INV MOL2631 (L. 12.49, W. 5.76, AL. 2.72 mm), St. 68; 463-510 m.

Previous records in Colombia: None.

Distribution: Brazil (BERTSCH AND D'ATTILIO, 1980), Colombia; depth range 100-610 m.

Remarks: This record extends the geographical range of the species to the Caribbean.

Trophon lacunellus Dall, 1889 (Fig. 32)

Reference:

Trophon (*Boreotrophon*) (*aculeatus* var.?) *lacunellus*: DALL, 1889: 205-206, pl. 15, fig. 4.

Material: One living specimen and five shells, INV MOL1817 (L. 15.67, W. 5.77, AL. 8.41 mm), 2342-2345; St. 12, 13, 17, 36; 488-510 m.

Previous records for Colombia: None.

Distribution: South Carolina, Florida, Guadeloupe, Barbados (DALL, 1889; SUNDERLAND AND SUNDERLAND, 1992), Colombia; depth range 366-1406 m.

Remarks: The shell features of the Colombian specimens are consistent with those of the syntype (USNM 86982, North Carolina, 846 m). This is the first record of the species for the southern Caribbean.

Family CORALIOPHILIDAE Chenu, 1859 *Babelomurex dalli* (Emerson and D'Attilio, 1963) (Fig. 33)

References:

Latiaxis (*Babelomurex*) *dalli*: EMERSON AND D'ATTILIO, 1963: 4-8, figs. 1-2.

Coralliphila dalli: BAYER, 1971: 184-187, fig. 46.

Latiaxis (*Babelomurex*) *dalli*: RIOS, 1994: 119, pl. 38, fig. 502.

Material: Two living specimens, INV MOL1823 (L. 24.11, W. 14.72, AL. 14.62 mm), 2346; St. 19, 27; 200-290 m.

Previous records for Colombia: None.

Distribution: North Carolina to Florida, Gulf of Mexico, Bahamas, St. Lucia, Guadeloupe, Barbados, Brazil (EMERSON AND D'ATTILIO, 1963; BAYER, 1971; SUNDERLAND, 1989; RIOS, 1994), Colombia; depth range 50-1606 m.

Remarks: The shell features of the specimens collected are consistent with those of the type material (holotype USNM 87215, Guadeloupe Island, 1580 m; USNM 876791, 198 m; USNM 876792, 227 m; USNM 87213, 270 m). This record extends the range of the species to the southern Caribbean.

Coralliophila squamosa (Bivona, 1838)
(Fig. 34)

References:

Coralliophila lamellosa: BAYER, 1971: 192-193, fig. 51.

Coralliophila squamosa: BOUCHET AND WARÉN, 1985: 153, figs. 357-361.

Material: Two living specimens and one empty shell, INV MOL1822 (L. 6.64, W. 3.62, AL. 3.87 mm, juvenal), 2347 (L. 19.6, W. 12.20, AL. 13.11 mm), 2347; St. 19, 21; 200-276 m.

Previous records for Colombia: None.

Distribution: In the eastern Atlantic, from the Bay of Biscay, along the Iberian Peninsula into the Mediterranean, northwest Africa, Canary Islands and Azores; in the western Atlantic, off Florida, the Peninsula of Yucatan (BAYER, 1971; BOUCHET AND WARÉN, 1985) and Colombia; depth range 60-1550 m.

Remarks: *C. lamellosa* (Philippi, 1836), *Hirtomurex squamulosus* (Philippi, 1836), and *H. longicauda* (Settepassi, 1971) are this species. This record extends the distribution range of the species to the southern Caribbean.

Family BUCCINIDAE Rafinesque, 1815
***Eosipho canetae* (Clench and Aguayo, 1944) (Fig. 35)**

References:

Plicifusus jamarci: OKUTANI, 1982: 111-113, pl. 1, figs. 4-6.

Plicifusus jamarci: OKUTANI, 1983: 279 + fig.

"*Buccinum*" *canetae*: WARÉN AND BOUCHET, 1993: 76-77, fig. 59 d.

Material: Five living specimens and several shells, INV MOL1824, 1825, 1826 (L. 76.11, W. 29.07, AL. 41.94 mm), 1827-1829, 2348, 2632, St. 05, 24, 26, 37, 68; 288-487 m.

Previous records for Colombia: None.

Distribution: Louisiana, Texas, Mexico, Cuba, Barbados, Surinam (OKUTANI, 1983; WARÉN AND BOUCHET, 1993), Colombia; depth range 288-850 m.

Remarks: This record extends the known geographic range of the species considerably westward along the northern South American coast.

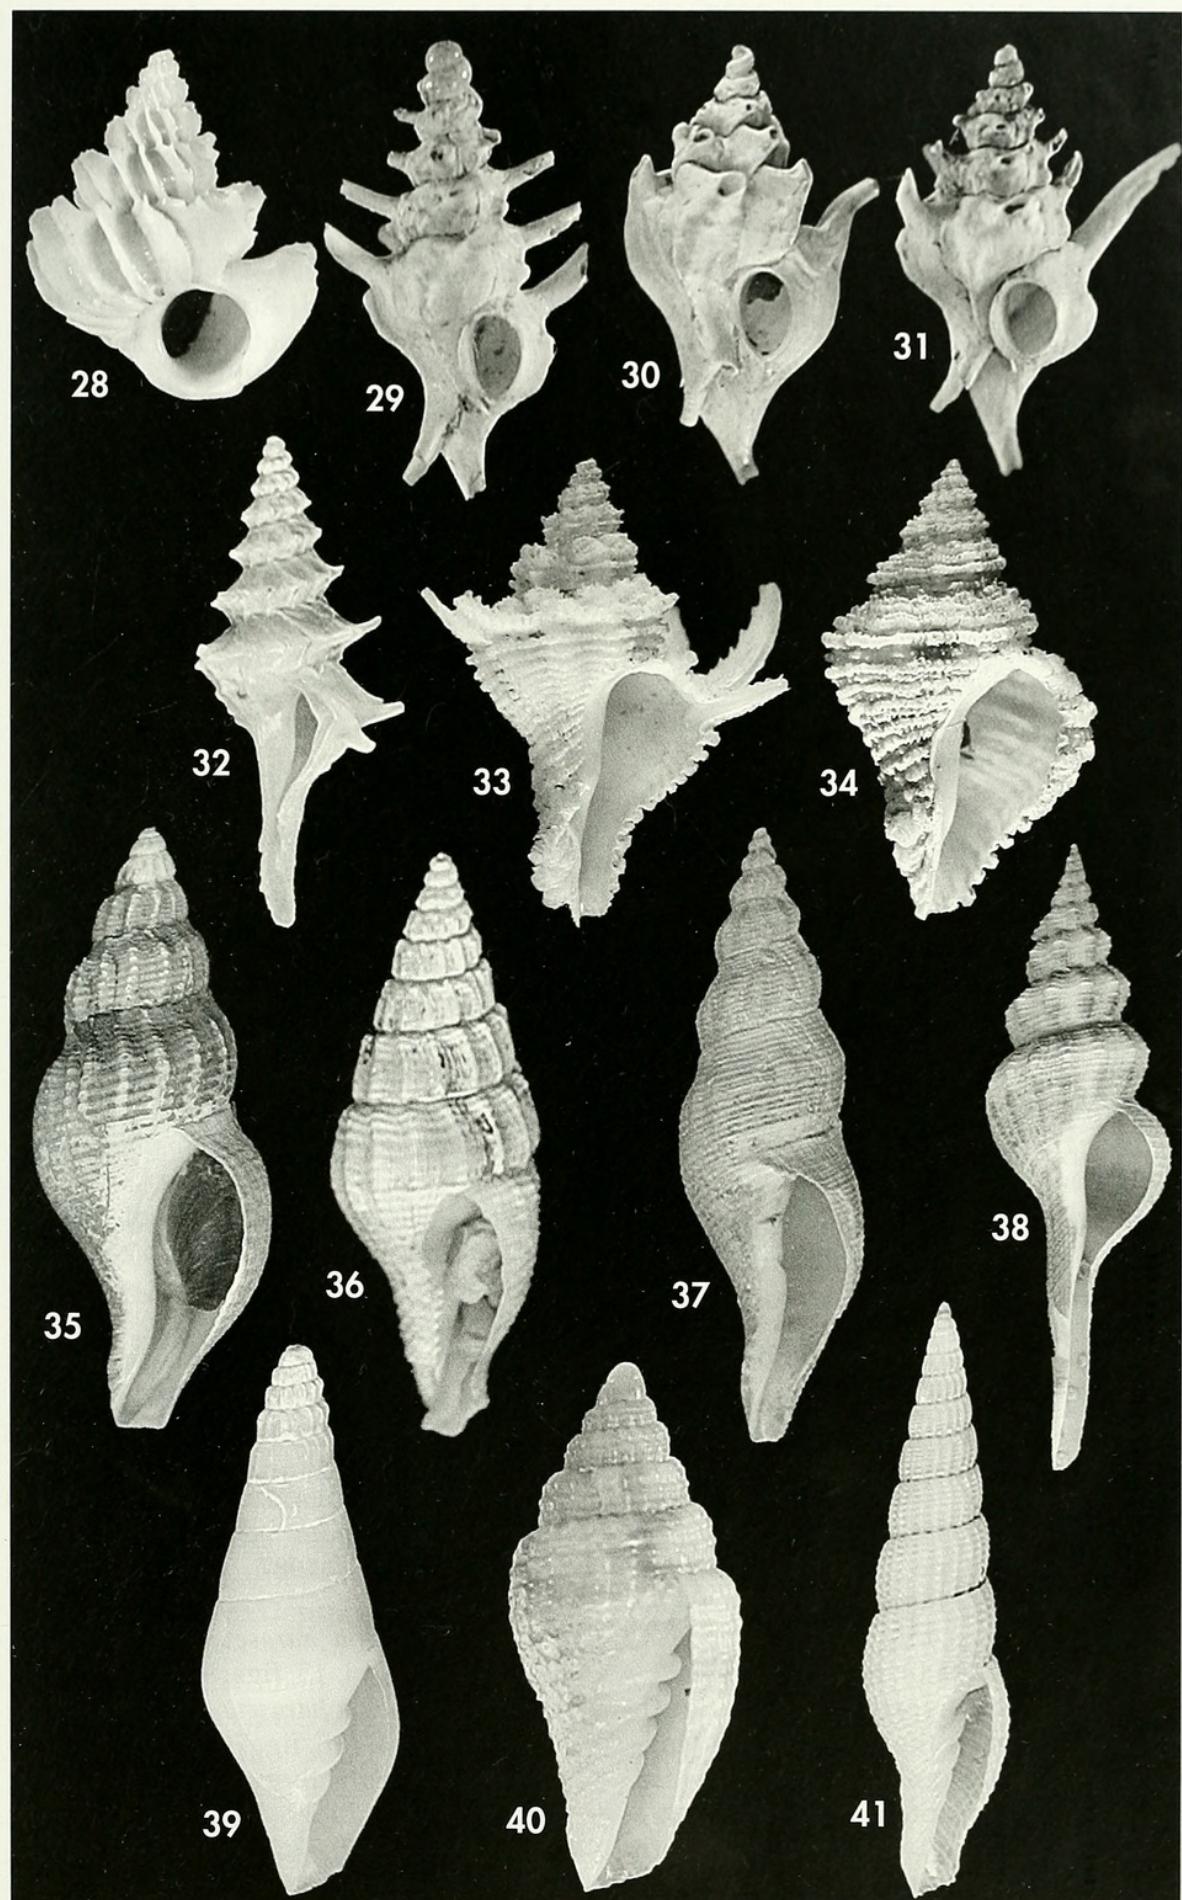

***Manaria fusiformis* (Clench and Aguayo, 1941)**

References:

Metula fusiformis: HARASEWYCH, 1990: 121-129, figs. 1-5.

(Right page) Figure 28. *Sthenorytis pernobilis*, L. 16.17 mm. Figure 29. *Laevityphis* sp., L. 8.36 mm. Figure 30. *Siphonochelus tityrus*, L. 10.93 mm. Mohnia kaicherae: PETUCH, 1987: 103, pl. 21, figs. 8, 9.

Mohnia kaicherae: DÍAZ AND PUYANA, 1994: 187-188, fig. 712.

Manaria fusiformis: RIOS, 1994: 120, fig. 505.

Material: Four living specimens and two shells, INV MOL1830, 1831 (L. 15.78, W. 7.37, AL. 10.18 mm), 3228, 3454, St. 10, 14, 28, 36; 296-500 m.

Previous records for Colombia: PETUCH (1987, as *Mohnia kaicherae*), off Cabo de La Vela.

Distribution: Cuba, Colombia, Gulf of Venezuela, North Brazil (HARASEWYCH, 1990; DÍAZ AND PUYANA 1994, RIOS 1994); depth range 183-578 m.

Remarks: The shell features of the specimens collected are consistent with the type material of *Mohnia kaicherae* Petuch, 1987 (USNM 859855, Los Monjes Islands, Venezuela, 200 m).

Mohnia sp. (Fig. 36)

Material: +80 shells and living specimens, INV MOL1832 (L. 21.58, W. 7.71, AL. 11.25 mm), 2633-2635, 2953, 2954, 2999, 3102, 3177, 3212, 3234, 3317, 3354, 3494, 3533; St. 02, 03, 07, 09, 10, 12, 15, 16, 20, 68; 292-510 m.

Previous records for Colombia: None.

Distribution: Colombia.

Remarks: This seems to be an unnamed species, but a thorough revision of literature and comparison with further material is needed to make a description.

Antillophos chazaliei (Dautzenberg, 1900)

References:

Phos chazaliei: DAUTZENBERG, 1900: 181-182, pl. 9, fig. 7.

Antillophos chazaliei: DÍAZ AND PUYANA, 1994: 188, fig. 715.

Material: One specimen INV MOL2815 (L 16.7 mm); St. 23; 206-208 m.

Previous records for Colombia: DAUTZENBERG (1900): off Santa Marta.

Distribution: North coast of South America, from off the mouth of the Magdalena river, Colombia, to the Leeward Islands off Venezuela (DAUTZENBERG, 1900; DÍAZ AND PUYANA, 1994); depth range 20-208 m.

Metula guppyi Olsson and Bayer, 1972

Reference:

Metula guppyi: OLSSON AND BAYER, 1972: 919-921, figs. 12 a-f.

Material: Seven empty shells, INV MOL 3563 (L. 53.76, W. 18.97, AL. 27.88 mm), 3564; St. 08, 15; 274-304 m.

Previous records for Colombia: OLSSON AND BAYER (1972), S of Gulf of Morrosquillo.

Distribution: Colombia, Trinidad (OLSSON AND BAYER, 1972); depth range 129-304 m.

Remarks: The shell features of the Colombian specimens are consistent with those of the type material (holotype USNM 706729; paratype USNM 706730, off Bocas de Drago, Trinidad).

Family NASSARIIDAE Iredale, 1916

Nassarius scissuratus (Dall, 1889)

References:

Nassa scissurata: DALL, 1889: 185-186.

Nassarius scissuratus: DÍAZ AND PUYANA, 1994: 195, fig. 750.

Nassarius scissuratus: RIOS, 1994: 129, pl. 41, fig. 555.

Material: 25 shells and living specimens INV MOL1842-1846, 1847 (L. 7.67, W. 4.36, AL. 3.98 mm), 2854, 2892, 3188, 3295, 3455; St. 09, 11, 14, 19, 21, 23, 29, 30, 37; 200-315 m.

Previous records for Colombia: DÍAZ (1989), Bahía Portete.

Distribution: Florida, Gulf of Mexico to Uruguay (DÍAZ AND PUYANA, 1994); depth range 30-315 m.

Remarks: The shell features of the specimens collected are consistent with those of the type material (USNM 86987, *Nassa scissurata*, Santa Lucia, 209 m).

Family FASCIOLARIIDAE Gray, 1853

Harasewychia harasewychi Petuch, 1987

References:

Harasewychia harasewychi: PETUCH, 1987: 101-102, pl. 13, figs. 9-10.

Harasewychia harasewychi: DÍAZ AND PUYANA, 1994: 198, fig. 766.

Material: Four living specimens, INV MOL1848 (L. 14.39, W. 6.75, AL. 9.08 mm), 1849, 2639, 3362; St. 12, 28, 32, 34; 488-519 m.

Previous records for Colombia: PETUCH (1987): off the Guajira Peninsula.

Distribution: Northernmost coasts of South America around the Guajira Peninsula (PETUCH, 1987; DÍAZ AND PUYANA, 1994); depth range 200-519 m.

Remarks: The shell features of the specimens collected are consistent with those of the holotype (USNM 859852, Los Monjes, Venezuela), 200 m.

***Buccinofusus surinamensis* Okutani,
1982 (Fig. 37)**

References:

Buccinofusus surinamensis: OKUTANI, 1982: 113-114, pl. 2, figs. 1-2.

Buccinofusus surinamensis: OKUTANI, 1983: 285+fig.

Material: One empty shell, INV MOL1850 (L. 63.29, W. 19.01, AL. 31.44 mm), St. 26; 308-322 m.

Previous records for Colombia: None.

Distribution: Surinam (OKUTANI, 1983), Colombia; depth range 308-322 m.

Remarks: This species was synonymized with *Manaria fusiformis* by BOUCHET AND WARÉN (1986) but removed and regarded as valid by HARASEWYCH (1990). This record extends the known geographic range of the species to the west along the northern South American coast.

***Fusinus lightbourni* Snyder, 1984 (Fig.
38)**

Reference:

Fusinus lightbourni: SNYDER, 1984: 28-29, figs. 1-3.

Material: One living specimen and seven shells, INV MOL2349 (L. 79.53, W. 22.39, AL. 46.49 mm), 2350, 2910; St. 01, 04, 19; 200-314 m.

Previous records for Colombia: None.

Distribution: Bermuda (SNYDER, 1984), Colombia; depth range 183-366 m.

Remarks: The shell features of the Colombian specimens are consistent with those of the paratype (USNM 819199, Bermuda). This is the first Caribbean record of the species, which appears to be widely distributed in the western Atlantic.

Family TURBINELLIDAE Swainson, 1840
***Latiromitra* sp. (Fig. 39)**

Material: One living specimen and two empty shells, INV MOL1852 (L. 26.18, W. 8.66, AL. 12.96 mm), 1853, 2640. St. 31, 32, 36; 484-516 m.

Previous records for Colombia: None.

Distribution: Colombia; depth range 484-516 m.

Remarks: We have been unable to identify the material with the available literature. It resembles *L. meekiana* (Dall, 1889), but differs in having a higher spire and a more angulated last whorl.

***Fulgurofusus brayi* (Clench, 1959)**

References:

Columbarium (*Fulgurofusus*) *brayi:* BAYER, 1971: 173-176, fig. 39 c; figs. 40 a-d.

Fulgurofusus brayi: HARASEWYCH, 1983: 6, figs. 1-2, 4-9.

Fulgurofusus brayi: DÍAZ AND PUYANA, 1994: 185, fig. 699.

Material: +90 shells and living specimens, INV MOL1854, 1855 (L. 41.91, W. 21.85 mm), 1856-1863, 2641-2644, 2883, 2919, 2926, 2952, 3004, 3025, 3079, 3114, 3156, 3287, 3332, 3399, 3439, 3474, 3498, 3518; St. 01-04, 06, 07, 09, 11-18, 20, 24-26, 28, 29, 31-34, 36, 68; 270-519 m.

Previous records for Colombia: BAYER (1971), NW of Gulf of Morrosquillo, off Cartagena; DÍAZ AND PUYANA (1994), off the Guajira Peninsula.

Distribution: Lesser Antilles and from Panama to eastern Venezuela (BAYER, 1971); depth range 270-800 m.

Family OLIVIDAE Latreille, 1825

***Olivella myrmecöön* Dall, 1912**

References:

Olivella (*Minioliva*) *myrmecöön:* OLSSON: 1956: 211, pl. 12, figs. 10, 10 a.

Olivella myrmecöön: DÍAZ AND PUYANA, 1994: 205, fig. 796.

Material: 30 empty shells INV MOL2816, 2817 (L. 6.85, W. 3.26, AL. 4.47 mm), 2645, 3387, 3393; St. 02, 10, 12, 13, 67; 309-510 m.

Previous records for Colombia: DÍAZ (1985), DÍAZ AND GÖTTING (1988), Santa Marta; DÍAZ (1989), Bahía Portete; DÍAZ AND PUYANA (1994), Cartagena.

Distribution: Costa Rica, Panama, Colombia (DÍAZ AND PUYANA, 1994); depth range 20-510 m.

Family MARGINELLIDAE Fleming, 1828

Volvarina hennequini Boyer, 2001

Reference:

Volvarina hennequini: BOYER, 2001: 3-8, figs. 9-16.

Material: 22 shells and living specimens, INV MOL1864-1869, 2312 (L. 23.35, W. 10.9 mm), 2313-2318, 2363, 2386; 446-510 m.

Previous records for Colombia: None.

Distribution: Honduras, Panama (BOYER, 2001), Colombia.

Family VOLUTOMITRIDAE Gray, 1854

Conomitra leonardhilli Petuch 1987

(Fig. 40)

Reference:

Conomitra leonardhilli: PETUCH, 1987: 109, pl. 23, fig. 6, pl. 26, fig. 12.

Material: 21 empty shells, INV MOL 1870-1876, 1877 (L. 15.28, W. 6.33, AL. 9.52 mm), 1878, 2351, 2352, 2647, 2648; St. 14, 15, 21, 26, 27, 30, 35, 37, 67; 260-326 m.

Previous records for Colombia: None.

Distribution: Venezuela (PETUCH, 1987), Colombia; depth range 35-326 m

Remarks: The shell features of the Colombian specimens are consistent with those of the holotype (USNM 784576, off Puerto Cabello, Venezuela, 35 m).

Volutomitra erebus Bayer, 1971

References:

Volutomitra erebus: BAYER, 1971: 218-221, figs. 66, 67 d-j.

Volutomitra erebus: DÍAZ AND PUYANA, 1994: 199, fig. 722.

Material: 40 living specimens and shells, INV MOL1879, 1880 (L. 24.6, W. 10.45, AL. 15.9 mm), 2649, 2912, 2942, 3003, 3098, 3176, 3197, 3231, 3318, 3343, 3495, 3532; St. 01-03, 07-10, 12, 15, 16, 20, 25, 68; 292-510 m.

Previous records for Colombia: BAYER (1971), off the Guajira Peninsula.

Distribution: Lesser Antilles (Granada), Colombia, Trinidad (BAYER, 1971); depth range 292-597.

Remarks: The shell features of the Colombian specimens are consistent with those of the holotype (USNM 701219, Colombia, 408-576 m).

Family COSTELLARIIDAE MacDonald, 1860

Vexillum styria (Dall, 1889) (Fig. 41)

Reference:

Mitra (Costellaria?) styria: DALL, 1889: 159-160, pl. 15, fig. 6.

Material: Seven living specimens and empty shells, INV MOL1881-1883 (L. 23.73, W. 5.46, AL. 9.44 mm), 2650; St. 30, 33, 35; 260-315 m.

Previous records for Colombia: None.

Distribution: Florida, Mexico, Cuba, Dominica, Barbados (DALL, 1889), Colombia; depth range 46-609 m.

Remarks: The shell features of the lectotype (USNM 86948, Dominica, 599 m) are consistent with those of the collected material. This record extends the distribution range of the species to the southern Caribbean.

Family CONIDAE Rafinesque, 1815

Conus mazei Deshayes, 1874

References:

Conus (Conasprella) mazei: OKUTANI, 1983: 295 + fig.

Conus mazei: DÍAZ AND PUYANA, 1994: 215, fig. 846.

Conus mazei: RIOS, 1994: 157, fig. 695.

Material: 40 living specimens and shells, INV MOL1884 (L. 42.99, W. 14.64, AL. 33.36 mm), 1885-1887, 2855, 2860, 2894, 2909, 3040, 3045, 3069, 3277, 3426, 3457; St. 01, 04, 06, 11, 14, 21, 23, 30, 33; 204-314 m.

Previous records for Colombia: BAYER ET AL. (1970), off Gulf of Urabá.

Distribution: Florida, Texas, Yucatan, Cuba, Jamaica, Martinique, Barbados to Surinam, south Brazil (OKUTANI, 1983; DÍAZ AND PUYANA, 1994; RIOS, 1994); depth range 84-549 m.

Conus villepinii Fischer and Bernardi, 1857 (Fig. 42)

References:

Conus villepinii: CLENCH, 1942: 25-26, pl. 12, fig. 3; pl. 13, fig. 5.

Conus (Endemnoconus) villepinii: OKUTANI, 1983: 297 + fig.

Conus villepinii: VINK, 1988: 11-14, fig. 4.

Conus villepinii: RIOS, 1994: 158, pl. 52, fig. 704.

Material: One living specimen and one shell, INV MOL1888 (L. 49.45, W. 21.31, AL. 40.33 mm), 2353; St. 11, 21; 274-308 m.

Previous records for Colombia: None.

Distribution: North Carolina, Florida, Bermuda, Mexico, Virgin Islands, Venezuela, Surinam, Brazil (CLENCH, 1942; OKUTANI, 1983; RIOS, 1994), Colombia; depth range 25-608 m.

Family TURRIDAE Swainson, 1840

Clathrodrillia albicoma (Dall, 1889) (Fig. 43)

References:

Drillia albicoma: DALL, 1889: 83-84, pl. 10, fig. 8.

Drillia albicoma: DALL AND SIMPSON, 1901: 385.

Material: Two shells, INV MOL1898 (L. 29.65, W. 9.02, AL. 11.65 mm), 2356; St. 09, 29; 290-312 m.

Previous records for Colombia: None.

Distribution: Florida, Gulf of Mexico, Barbados, Brazil (DALL, 1889; SUNDERLAND AND SUNDERLAND, 1993; RIOS, 1994), Colombia; depth range 151-1470 m

Remarks: The shell morphology and sculpture of the Colombian material are consistent with those of the syntypes (USNM 87461, Yucatan, 151 m, and USNM 87462, Barbados, 180 m).

Agladrillia sp. (Fig. 44)

Material: Seven specimens, INV MOL1893, 1894 (L. 12.32, W. 4.06, AL. 3.5 mm), 1895, 2653; St. 26, 67; 308-322 m.

Previous records for Colombia: None.

Distribution: Colombia; depth range 308-322 m.

Remarks: According to shell features, the specimens collected belong undoubtedly to this poorly known genus, although to an apparently yet unnamed species.

Drilliola loprestiana (Calcaro, 1841) (Fig. 45)

References:

Pleurotoma (Mangilia) comatotropis: DALL, 1881: 58.

Pleurotoma (Mangilia) comatotropis: DALL, 1889: 116, pl. 11, fig. 82.

Drilliola loprestiana: BOUCHET AND WARÉN (1980): 32, fig. 82.

Material: Four specimens, INV MOL1896 (L. 6.33, W. 2.47, AL. 2.93 mm), 1897, 2354; St. 11, 21, 26; 274-318 m.

Previous records for Colombia: None.

Distribution: NE Atlantic, Bay of Biscay and the Mediterranean. Western Atlantic, New England, Georgia, Florida, Texas, Gulf of Mexico, Yucatan, Barbados, Cuba, Bermuda, Brazil (BOUCHET AND WARÉN, 1980), Colombia; depth range 45-1935 m.

Remarks: The shell features of the Colombian specimens are consistent with those of the type material of *Microdrillia comatotropis* (USNM 902870, USNM 902869, Gulf of Mexico, Florida Keys, 198 m).

Drilliola sp.

Material: Four living specimens and four shells, INV MOL2818 (L. 10.95, W. 4.56, AL. 4.6 mm), 3394, 3395, 3450; St. 07, 12, 14; 296-494 m.

Previous records for Colombia: None.

Distribution: Colombia; depth range 296-494 m.

Remarks: This seems to be an unnamed species of this poorly known genus. A thorough revision is currently being done.

Globidrillia smirna (Dall, 1881) (Fig. 46)

References:

Pleurotoma (Drillia) smirna: DALL, 1881: 66.

Drillia smirna: DALL, 1889: 94, pl. 11, fig. 7.

Material: Two living specimens and six shells, INV MOL1889, 1890 (L. 23.47, W. 5.48, AL. 7.5 mm), 1891, 1892, 2652; St. 28, 32, 34; 510-519 m.

Previous records for Colombia: DALL (1889): Old Providence Island (Isla Providencia), an oceanic island in the southwestern Caribbean.

Distribution: Gulf of Mexico, Cuba, Old Providence Island (DALL, 1881, 1889), off Colombian mainland; depth range 510-743 m.

***Splendrillia lissotropis* (Dall, 1881)
(Fig. 47)**

References:

Pleurotoma (Mangilia) lissotropis: DALL, 1881: 58-59.

Splendrillia lissotropis: RIOS, 1994: 163, pl. 54, fig. 737.

Material: Three living specimens and two empty shells, INV MOL1899 (L. 7.76, W. 2.46, AL. 3.17 mm), 1900, 1901, 2357; St. 14, 26; 296-326 m.

Previous records for Colombia: None.

Distribution: Florida, Panama, Cuba, Brazil (DALL, 1881; RIOS, 1994), Colombia; depth range 30-396 m.

***Cryptogemma* sp. (Fig. 48)**

Material: 55 living specimens and numerous shells, INV MOL1902-1905, 1906 (L. 18.61, W. 8.71, AL. 10.36 mm), 1907, 2654, 3020, 3110, 3165, 3205, 3241, 3335, 3342, 3356, 3401, 3475, 3520, 3525; St. 03, 07, 09, 10, 12, 13, 15, 17, 25, 28, 32, 39, 68; 292-520 m.

Previous records for Colombia: None.

Distribution: Colombia; depth range 292-520 m.

Remarks: This apparently unnamed species, is the first member of this turrid genus known for the Atlantic. Its description is in process.

***Gemmula periscelida* (Dall, 1889)**

References:

Pleurotoma (Pleurotoma) periscelida: DALL, 1889, 74-75, pl. 32, fig. 2.

Gemmula periscelida: OKUTANI, 1983: 300 + fig.

Gemmula periscelida: DÍAZ AND PUYANA, 1994: 219-220, fig. 867.

Material: 33 empty shells and living specimens, INV MOL1909 (L. 33.38, W. 11.51, AL. 17.79 mm) 2841, 2845, 2870, 2885, 2905, 2948, 2988, 3046, 3054, 3157, 3173, 3189, 3306, 3409, 3418, St. 01-04, 09, 11, 13, 14, 15, 18, 21, 22, 32; 274-520 m.

Previous records for Colombia: DALL (1889), off Gulf of Morrosquillo; DÍAZ AND PUYANA (1994), off the Guajira Peninsula.

Distribution: North Carolina, Florida, Alabama, Colombia, Surinam (DALL, 1889; OKUTANI, 1983; DÍAZ AND PUYANA, 1994; SUNDERLAND AND SUNDERLAND, 1993); depth range 150-600 m.

***Polystira tellea* (Dall, 1889) (Fig. 49)**

References:

Pleurotoma (Pleurotoma) albida var. *tellea*: DALL, 1889: 73.

Polystira tellea: OKUTANI 1983: 302 + fig.

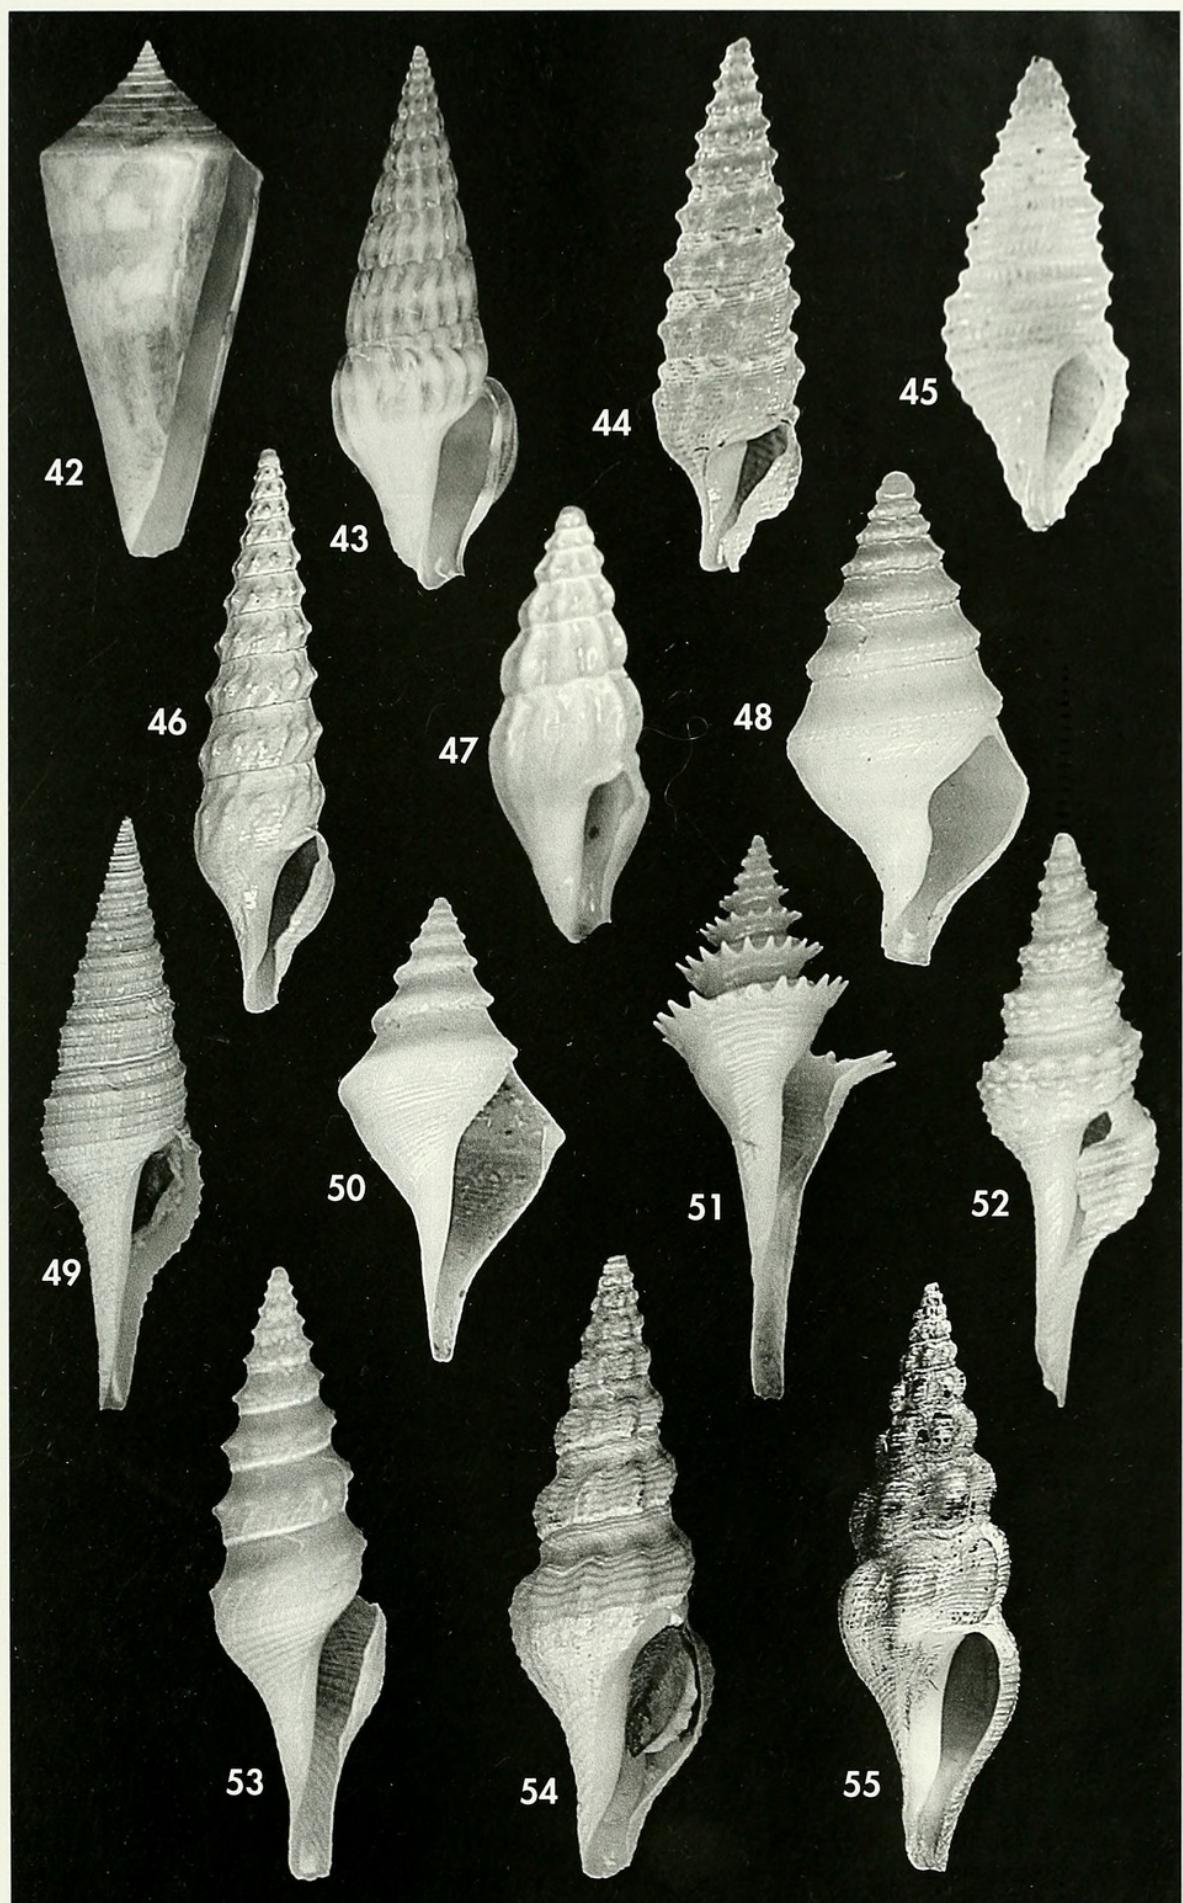

Material: +300 living specimens and empty shells INV MOL1910 (L. 63.66, W. 18.11, AL. 34.33 mm), 1912-1923, 2655, 2656, 2849, 2901, 2984, 3024, 3041, 3053, 3055, 3074, 3133, 3154, 3191, 3244, 3258, 3291, 3305, 3384, 3418, 3449, 3463, 3488; St. 01, 03, 04, 06, 08, 10, 11, 13-15, 16, 21, 18, 23, 24, 26, 29, 30, 33, 35, 39, 67; 204-505 m.

Previous records for Colombia: None.

Distribution: Florida to Louisiana, Texas, Surinam (BULLIS, 1956a; OKUTANI, 1983; SUNDERLAND AND SUNDERLAND, 1993), Colombia; depth range 53-505 m.

(Right page) Figure 42. *Conus villepinii*, L. 49.45 mm. Figure 43. *Clathrodrillia albicoma*, L. 29.65 mm. Figure 44. *Agladrillia* sp., L. 12.32 mm. Figure 45. *Drilliola loprestiana*, L. 5.05 mm. Figure 46. *Globidrillia smirna*, L. 18.68 mm. Figure 47. *Splendrillia lissotropis*, L. 7.76 mm. Figure 48. *Cryptogemma* sp., L. 18.61 mm. Figure 49. *Polystira tellea*, L. 56.0 mm. Figure 50. *Thatcherina* sp., L. 15.2 mm. Figure 51. *Cochlespira radiata*, L. 17.36 mm. Figure 52. *Fusiturricula enae*, L. 15.24 mm. Figure 53. *Leucosyrinx verrillii*, L. 20.56 mm. Figure 54. *Stenodrillia gundlachi*, L. 36.38 mm. Figure 55. *Stenodrillia horrenda*, L. 51.63 mm.

(Página derecha) Figura 42. *Conus villepinii*, L. 49.45 mm. Figura 43. *Clathrodrillia albicoma*, L. 29.65 mm. Figura 44. *Agladrillia* sp., L. 12,32 mm. Figura 45. *Drilliola loprestiana*, L. 5,05 mm. Figura 46. *Globidrillia smirna*, L. 18,68 mm. Figura 47. *Splendrillia lissotropis*, L. 7,76 mm. Figura 48. *Cryptogemma* sp., L. 18,61 mm. Figura 49. *Polystira tellea*, L. 56,0 mm. Figura 50. *Thatcherina* sp., L. 15,2 mm. Figura 51. *Cochlespira radiata*, L. 17,36 mm. Figura 52. *Fusiturricula enae*, L. 15,24 mm. Figura 53. *Leucosyrinx verrillii*, L. 20,56 mm. Figura 54. *Stenodrillia gundlachi*, L. 36,38 mm. Figura 55. *Stenodrillia horrenda*, L. 51,63 mm.

Remarks: The shell features of the material collected are consistent with those of the syntypes of *Pleurotoma albida tellea* (USNM 93912, Florida, 200 m and USNM 93606, Florida, 108 m). Previous deep water records in the area of *P. albida* (Perry, 1811), a species with larger and somewhat different sculptured shell living in shallower depths (cf. ABBOTT, 1974; RIOS, 1994) might probably include material of this species.

Thatcherina sp. (Fig. 50)

Material: One specimen, INV MOL2319 (L. 15.2, W. 7.56 mm); St. 10; 492-502 m.

Previous records for Colombia: None.

Distribution: Colombia; depth range 492-502 m.

Remarks: Although a single specimen was collected, morphological features of the protoconch and the body whorl are consistent with those of the genus *Thatcherina* Vera-Peláez, 1998 (J. L. Vera-Peláez *in litt* and D. L. Tippet *com. pers.*).

Cochlespira elegans (Dall, 1881)

References:

Pleurotoma (Ancistrosyrinx) elegans: DALL, 1881: 54.

Pleurotoma (A.) elegans: DALL, 1889: 78, pl. 38, fig. 3.

Cochlespira elegans: DÍAZ AND PUYANA, 1994: 219, fig. 864.

Material: Five living specimens and five shells, INV MOL3516 (L. 45.17, W. 15.76, AL. 28.40 mm), 2819, 2820, 2893, 3213; St. 03, 05, 07, 10, 17; 434-500 m.

Previous records for Colombia: DÍAZ AND PUYANA (1994), off the Guajira Peninsula.

Distribution: Florida, Cuba, Jamaica, Colombia (DALL, 1881; SUDERLAND, 1991; DÍAZ AND PUYANA, 1994); depth range 100-1449 m.

Cochlespira radiata (Dall, 1889) (Fig. 51)

References:

Pleurotoma (Ancistrosyrinx) radiata: DALL, 1889: 78-79, pl. 12, fig. 12.

Pleurotoma radiata: DALL AND SIMPSON, 1901: 384.

Cochlespira radiata: RIOS, 1994: 164, pl. 54, fig. 743.

Material: Nine living specimens and shells, INV MOL1924 (L. 17.36, W. 6.62, AL. 11.24 mm), 2358-2362; St. 01, 04, 08, 14, 23, 33; 269-314 m.

Previous records for Colombia: None.

Distribution: North Carolina to Florida, Louisiana, Texas, Gulf of Mexico, Puerto Rico, Jamaica, St. Croix, Martinique, St. Lucia, Barbados, Brazil (DALL, 1889; DALL AND SIMPSON, 1901; SUnderland, 1991; RIOS, 1994), Colombia; depth range: 45-1152 m.

Remarks: The shell morphology and sculpture of the syntypes of *Pleurotoma radiata* (USNM 87398, Santa Lucia, 209 m; USNM 87399, Martinique, 306 m; USNM 87400, Barbados, 151 m) are consistent with those of the material reported here.

Fusiturridula enae Bartsch, 1934 (Fig. 52)

Reference:

Fusiturridula enae: BARTSCH, 1934: 13, pl. 3, figs. 1-2, 10.

Material: 17 living specimens and shells, INV MOL1925, 1926, 1927 (L. 16.49, W. 5.02, AL. 8.37 mm), 1928, 1929, 2365, 2657; St. 14, 21, 26, 30, 32, 33, 67; 260-520 m.

Previous records for Colombia: None.

Distribution: Puerto Rico (BARTSCH, 1934), Colombia; known depth range 260-648 m.

Remarks: The shell features of the collected specimens are consistent with those of the type material from off Puerto Rico (USNM 430619 and 430394). This is the second record of the species.

Leucosyrinx verrillii (Dall, 1881) (Fig. 53)

References:

Pleurotoma (Pleurotomella) verrillii: DALL, 1881: 57.

Pleurotoma (Leucosyrinx) verrillii: DALL, 1889: 75, pl. 10, fig. 5.

Leucosyrinx verrilli: BOUCHET AND WARÉN, 1980: 23-25, figs. 68-69.

Leucosyrinx verrillii: RIOS, 1994: 166, pl. 55, fig. 754.

Material: +70 living specimens and shells, INV MOL1930-1933, 1934 (L.

24.05, W. 5.84, AL. 10.94 mm), 1935-1938, 2659-2661, 2940, 2996, 3086, 3120, 3178, 3214, 3303, 3316, 3405, 3492; St. 02, 03, 05, 07, 09-13, 15, 20, 25, 32, 34, 36, 67, 68; 292-520 m.

Previous records for Colombia: None.

Distribution: Eastern and western Atlantic, Azores, Spain, North Carolina, Florida, Gulf of Mexico, Yucatan, Cuba, Brazil (DALL, 1881; BOUCHET AND WARÉN, 1980; SUNDERLAND, 1991; RIOS, 1994), Colombia; depth range 274-3000 m.

Stenodrillia gundlachi (Dall and Simpson, 1901) (Fig. 54)

References:

Drillia gundlachi: DALL AND SIMPSON, 1901: 386, pl. 57, fig. 17.

Compsodrillia gundlachi: RIOS, 1994: 169, pl. 56, fig. 771.

Material: +130 living specimens and many shells, INV MOL1941 (L. 57.68 mm, W. 16.7, AL. 27.07 mm), 1942-1946, 2665-2667, 2913, 2971, 2985, 3048, 3085, 3108, 3196, 3302, 3346, 3396, 3496, 3557; St. 01-05, 07, 10, 11-13, 15, 22, 24, 25, 68; 292-510 m.

Previous records for Colombia: None.

Distribution: Puerto Rico, Brazil (DALL AND SIMPSON, 1901; RIOS, 1994), Colombia; depth range 50-510 m.

Remarks: The shell features of the Colombian specimens are consistent with those of the type material (USNM 159686, Mayagüez, Puerto Rico). This record extends the distribution range of the species to the southern Caribbean.

Stenodrillia horrenda (Watson, 1886) (Fig. 55)

References:

Pleurotoma (*Drillia*) *horrenda:* WATSON, 1886: 308-309, pl. 26, fig. 4.

Stenodrillia horrenda: SUNDERLAND AND SUNDERLAND, 1993: 14.

Material: One specimen, INV MOL2669 (L. 51.63, W. 17.2, AL. 22.97 mm), St. 68; ca. 487 m.

Previous records in Colombia: None.

Distribution: Florida, Brazil, Cuba (WATSON, 1886; SUNDERLAND AND SUNDERLAND, 1993), Colombia; depth range 396-640 m.

Remarks: The shell features of the Colombian specimens are consistent with material dredged off Bahia de Cochinos, Cuba, 600 m (USNM 902172).

Hindsiclava alesidota (Dall, 1889) (Fig. 56)

Reference:

Drillia alesidota: DALL, 1889: 84-85.

Material: Four living specimens and seven empty shell, INV MOL2662 (L. 38.88, W. 9.68, AL. 17.88 mm), 2663, 2664, St. 67; 309 m.

Previous records in Colombia: None.

Distribution: North Carolina, Florida, Texas, Louisiana (DALL, 1889; SUNDERLAND, 1991).

Remarks: The morphology and sculpture of the collected material are consistent with those of the syntypes (USNM 93607, North Carolina, 113 m, and USNM 93608, North Carolina, 193 m). This record extends the geographical range of the species considerably to the southern Caribbean.

Compsodrillia polytorta (Dall, 1881) (Fig. 57)

References:

Pleurotoma (*Drillia*) *polytorta:* DALL, 1881: 61-62.

Drillia polytorta: DALL, 1889: 85, pl. 10, fig. 6.

Crassispira polytorta: OKUTANI, 1983: 304 + fig.

Material: 13 living specimens and shells, INV MOL1939, 1940 (L. 37.78, W. 8.65, AL. 14.42 mm), 2936, 2995, 3011; St. 02, 03, 26, 34; 308-500 m.

Previous records for Colombia: None.

Distribution: Gulf of Mexico, Cuba, Surinam (OKUTANI, 1983), Colombia; depth range 308-755 m.

Remarks: The morphology and sculpture of the collected material are consistent with those of the holotype (USNM 412171, Cape San Antonio, Cuba, 743 m).

Compsodrillia tristicha (Dall, 1889) (Fig. 58)

References:

Drillia tristicha: DALL, 1889: 88-89.

Drillia tristicha: RIOS, 1994: 169, pl. 56, fig. 773.

Material: Three living specimens and several empty shells, INV MOL1947 (L. 29.1, W. 6.98, AL. 11.65 mm), 2368, 2369, 2668; St. 08, 09, 33, 67; 269-312 m.

Previous records for Colombia: None.

Distribution: Alabama, Mississippi, Florida, Gulf of Mexico, south Brazil (DALL, 1889; RIOS, 1994), Colombia; depth range 164-378 m.

Remarks: The shell form and sculpture of the Colombian material are consistent with those of the syntypes (USNM 93852, Florida, 353 m; USNM 93969, Florida, 200 m). This is the first Caribbean record for the species, which seemingly has a wide distribution in the western Atlantic.

Glyphostoma epicasta Bartsch, 1934 (Fig. 59)

References:

Glyphostoma epicasta: BARTSCH, 1934: 14-15, pl. 4, figs. 4, 7, 9.

Glyphostoma epicasta: RIOS, 1994: 171, pl. 56, fig. 780.

Material: One living specimen and two empty shells, INV MOL1948 (L. 33.44, W. 8.8, AL. 15.71 mm), 1949, 2373; St. 16, 28, 34; 461-500 m.

Previous records for Colombia: None.

Distribution: Puerto Rico, south Brazil (BARTSCH, 1934; RIOS, 1994), Colombia; depth range 150-648 m.

Remarks: The shell features of the Colombian specimens are consistent with those of the holotype (USNM 430507). This record extends the distribution range of the species to the southern Caribbean.

Glyphostoma gabbii (Dall, 1889) (Fig. 60)

References:

Mangilia (Glyphostoma) gabbii: DALL, 1889: 108-109, pl. 13, figs. 4-5, 7-8.

Glyphostoma gabbii: RIOS, 1994: 171, pl. 57, fig. 781.

Material: Nine empty shells, INV MOL1950-1953, 1954 (L. 16.31, W. 5.51, AL. 9.1 mm); St. 27, 29, 33, 35; 269-315 m

Previous records for Colombia: None.

Distribution: Florida, Gulf of Mexico, Cuba, Lesser Antilles, Brazil (DALL, 1889; RIOS, 1994), Colombia; depth range 55-795 m.

Remarks: The morphology and sculpture of the Colombian material agree with those of the syntype (USNM 87410, Barbados, 484 m).

Mangelia subsida (Dall, 1881) (Fig. 61)

References:

Pleurotoma (Drillia) subsida: DALL, 1881: 62.

Pleurotoma (Mangilia?) subsida: DALL, 1889: 118, pl. 12, fig. 3.

Material: One living specimen and one empty shell, INV MOL2355 (L. 11.54, W. 4.98, AL. 5.63 mm), 2651; St. 02, 67; 309-452 m.

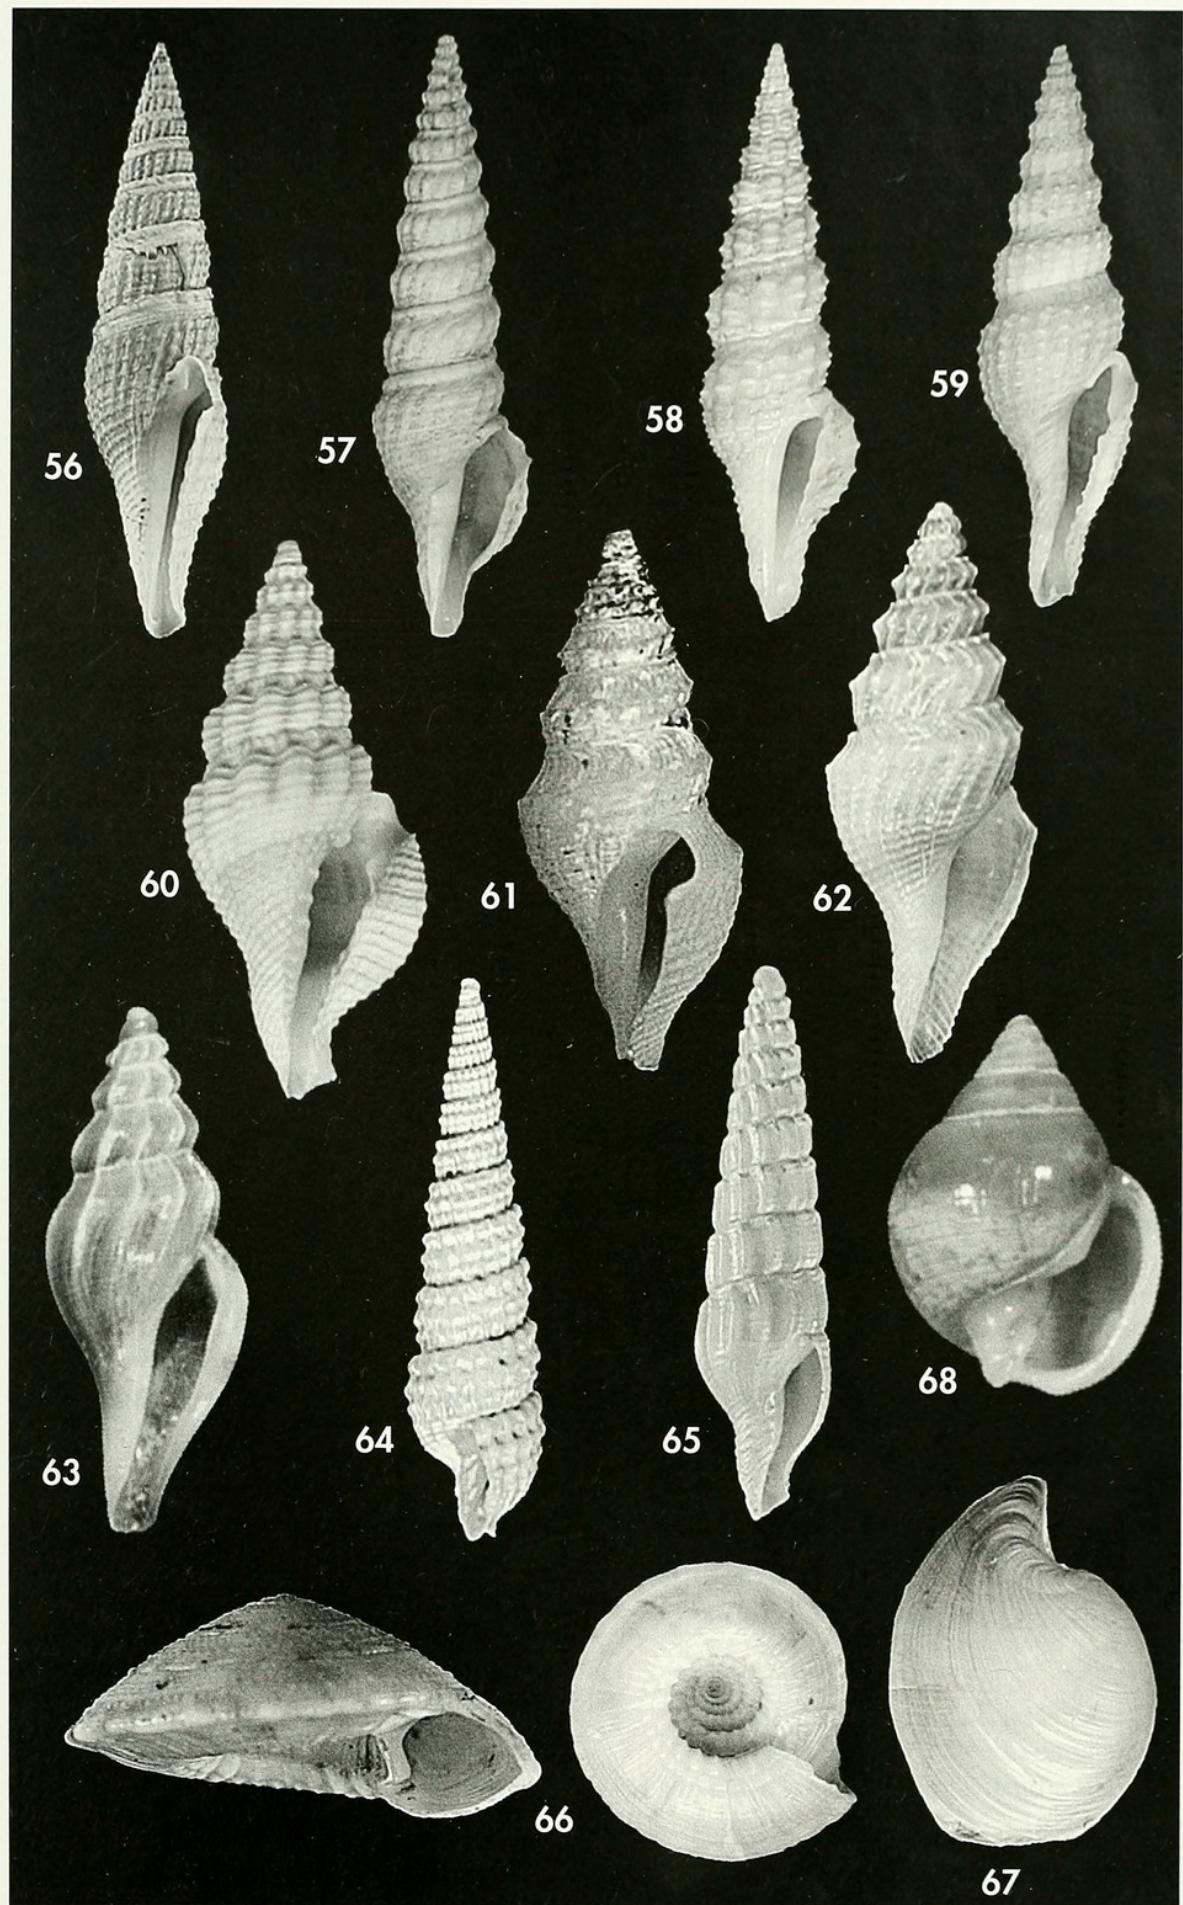

Previous records for Colombia: None.

Distribution: Florida (DALL, 1881) and off the Guajira Peninsula, Colombia; depth range 309-610 m.

Remarks: Shell morphology and sculpture of the specimen collected are consistent with the type material (USNM 410655, off Florida, 610 m). This

is the second record of the species, and the first one for the Caribbean Sea.

Benthomangelia sp. (Fig. 62)

Material: 48 living specimens and empty shells, INV MOL1956, 1957 (L. 9.11, W. 3.87, AL. 5.2 mm); St. 02, 03, 07, 09-15, 21, 24; 274-510 m.

Previous records for Colombia: None.

Distribution: Colombia; depth range 274-510 m.

Remarks: We have been unable to identify this species. A thorough revision of literature and comparison with other material are necessary.

Cryoturris quadrilineata (C. B. Adams, 1850)

References:

Pleurotoma quadrilineata: CLENCH AND TURNER, 1950b: 336, pl. 29, fig. 12.

Cryoturris quadrilineata: DÍAZ AND PUYANA, 1994: 229, fig. 910.

Material: One empty shell INV MOL1959 (L. 6.65, W. 2.44, AL. 4.01 mm), St. 29; 290-296 m.

Previous records for Colombia: DÍAZ (1985), Bahía de Nenguanje, near Santa Marta.

Distribution: Mexico, Costa Rica, Panama, Colombia, Jamaica, St. Croix (USTICKE, 1959; DÍAZ AND PUYANA, 1994); depth range 15-296 m.

Ithyicythara cymella (Dall, 1889) (Fig. 63)

Reference:

Mangilia (Cythara) cymella: DALL, 1889: 101-102, pl. 12, fig. 4.

Material: One living specimen, INV MOL1958 (L. 7.74, W. 2.97, AL. 4.54 mm); St. 21; 274-276 m.

Previous records for Colombia: None.

Distribution: Florida, Gulf of Mexico, Cuba, St. Vincent, Barbados, Grenada (DALL, 1889; SUNDERLAND AND SUNDERLAND, 1993), Colombia; depth range 117-276 m.

Kurtziella serga (Dall, 1881)

References:

Pleurotoma (Drillia) serga: DALL, 1881: 65-66.

Manglia serga: BOUCHET AND WARÉN: 1980: 30, figs. 42, 80, 214.

Cryoturris serga: DÍAZ AND PUYANA, 1994: 230, fig. 911.

Cryoturris serga: RIOS, 1994: 173, pl. 57, fig. 796.

Material: One living specimen INV MOL1955, (L. 6.5, W. 2.72 mm, AL. 3.05), St. 26; 314-318 m.

Previous records for Colombia: DÍAZ (1985), Bahía de Nenguanje, near Santa Marta. DÍAZ AND PUYANA (1994), off Gulf of Salamanca, off Santa Marta.

Distribution: Northern mid-Atlantic, including the Mediterranean (BOUCHET AND WARÉN, 1980); west Atlantic, Bermuda, Texas, Gulf of Mexico, Costa Rica, Colombia, Brazil (DÍAZ AND PUYANA, 1994; RIOS, 1994); depth range 6-1980 m.

Family TEREBRIDAE Murch, 1852

Terebra sp. 1 (Fig. 64)

Material: +40 empty shells, INV MOL1961 (L. 16.4, W. 3.84, AL. 4.03 mm), St. 08, 09, 11, 14, 15, 21, 26.

Previous records for Colombia: None.

Distribution: Colombia; depth range, 274-326 m.

Uncertain placement

"*Terebra*" sp. 2 (Fig. 65)

Material: Six empty shells, INV MOL1978 (L. 12.69, W. 3.63, AL. 4.72 mm), 2387, 2672, St. 32; 514-520 m.

Previous records for Colombia: None.

Distribution: Colombia.

Family ARCHITECTONICIDAE Gray, 1850

Discotectonica discus (Phillipi, 1844) (Fig. 66)

Reference:

Solarium peracutum: DALL, 1889: 275, pl. 33, figs. 2, 5.

Material: One specimen, INV MOL2374 (L. 7.96, W. 16.17, AL. 4.21 mm); St. 19; 200 m.

Previous records for Colombia: None.

Distribution: Eastern and western Atlantic, in the latter known from North Carolina, Florida, off Mississippi, St. Croix, and Barbados (DALL, 1889; BULLIS, 1956a; PORTER, 1974; REED AND MIKKELSEN, 1987), Colombia; depth range 82-329 m.

Remarks: The shell form and sculpture of the Colombian specimen are con-

sistent with those of the lectotype of *Solarium peracutum* Dall, 1889 from Barbados (USNM 83694).

Family PHILINIDAE Gray, 1850

***Philine alba* Mattox, 1958 (Fig. 67)**

Reference:

Philine alba: MARCUS AND MARCUS, 1967: 607-609, figs. 23-28.

Material: Five specimens, INV MOL2375, 2376 (L. 12.2, W. 8.9 mm), 2378; St. 23; 204-206 m.

Previous records for Colombia: None.

Distribution: Amphiamerican, in the western Atlantic known from Panama and Brazil (MARCUS AND MARCUS, 1967; MARCUS, 1977; RIOS, 1994), Colombia; depth range 46-206 m.

***Philine infundibulum* Dall, 1889**

References:

Philine infundibulum: DALL, 1889: 57-58.

Philine infundibulum: DÍAZ AND PUYANA, 1994: 245.

Philine infundibulum: RIOS, 1994: 196, pl. 64, fig. 920.

Material: 21 living specimens INV MOL1977, (L 8.30 mm), 2699, 2700, St. 21, 67; 274-309 m.

Previous records for Colombia: BAYER ET AL. (1970), off Gulf of Morrosquillo.

Distribution: Bermuda, Florida, Cuba, Guadalupe, Dominica, Barbados, Colombia to Brazil (DALL, 1889; MARCUS, 1977; DÍAZ AND PUYANA, 1994; RIOS, 1994); depth range, 68-724 m.

Family RINGICULIDAE Philippi, 1853

***Ringicula nitida* Verrill, 1872 (Fig. 68)**

References:

Ringicula nitida: DALL, 1881: 97.

Ringicula nitida: RIOS, 1994: 193, pl. 63, fig. 903.

Material: One living specimens and eight shells, INV MOL1964 (L. 5.63, W. 3.86, AL. 3.3 mm), 2380-2383; St. 07, 10, 12, 39; 292-500 m.

Previous records for Colombia: None.

Distribution: Mediterranean and Pliocene from Italy; New England, Bermuda, Gulf of Maine, Florida, Gulf of Mexico, Yucatan Strait, Lesser Antilles, Brazil (DALL, 1889; MARCUS, 1977;

RIOS, 1994), Colombia; depth range 180-1935 m.

Family CYLICHNIDAE H. and A. Adams, 1854

***Scaphander watsoni rehderi* Bullis, 1956**

References:

Scaphander watsoni rehderi: BULLIS, 1956b: 13-14, figs. 3 a-d.

Scaphander watsoni rehderi: MARCUS AND MARCUS, 1967: 602-603, figs. 5-9.

Scaphander watsoni rehderi: DÍAZ AND PUYANA, 1994: 241, fig. 970.

Material: +70 living specimens and shells, INV MOL1965-1969, 1970 (L. 38.86, W. 21.37 mm), 1971-1976, 2673, 2674, 2853, 2896, 3033, 3067, 3149, 3169, 3203, 3300, 3453, 3486, 3500, 3526, 3555; St. 01, 04, 06, 08-11, 14-17, 21-23, 25-27, 29, 34, 35, 37, 67, 68; 206-510 m.

Previous records for Colombia: MARCUS AND MARCUS (1967), Gulf of Darien, off the Guajira Peninsula; BAYER ET AL. (1970), off Gulf of Morrosquillo.

Distribution: Mississippi, Louisiana, Gulf of Mexico, Panama, Colombia (BULLIS, 1956b; MARCUS AND MARCUS, 1967; DÍAZ AND PUYANA, 1994); depth range 134-549 m.

Family ARMINIDAE Rafinesque, 1814

***Armina juliana* Ardila and Díaz, 2002**

Reference:

Armina juliana: ARDILA AND DÍAZ, 2002: 25-31.

Material: Two specimens, Holotype INV MOL1598 (L. 41 mm alive), Paratype LACM-2908 (L. 14 mm alive), St. 05, 09; 306-460 m.

Previous records for Colombia: ARDILA AND DÍAZ (2002): known only from the type locality off Cabo de La Vela and Palomino.

Distribution: Colombia; at 306-460 m in depth.

ACKNOWLEDGEMENTS

The "INVEMAR-Macrofauna" campaigns were carried out with the financial support of COLCIENCIAS (project No. 210509-10401) and the Colombian Ministry of the Environment through project

No. 001065 of the Fondo Nacional Ambiental. The authors are indebted to Gabriel R. Navas and the other members of the Taxonomy Research Group of INVEMAR for their collaboration and good fellowship. Capt. José Polo and the crew of the R/V Ancón are gratefully acknowledged for their cooperation aboard the ship. We are especially indebted to Yolanda Villacampa, Tyjuana Nickens, Dr. Jerry Ha-

rasewych and Paul Greenhall for their hospitality and assistance at the NMNH, Smithsonian Institution, Washington D.C. Special thanks also to Dr. Donn L. Tippet for kindly helping to solve difficulties with the species of Turridae, and to Susanne Braden and Scott Whitaker (NMNH) for their assistance with the SEM micrographs. This is contribution No. 793 of INVEMAR.

ABSTRACT

The taxonomic identity and distribution of *Cleavelandia mystica* (Pfeffer, 1883) are studied on the basis of new records. The important variability of its shell morphology, particularly regarding the ambiguous identity of the species in the literature, is discussed, along with a comparison. The distribution of *C. mystica* is shown to range from both Central Caribbean Sea and,

RESUMEN

Se estudian los datos para determinar la distribución de *Cleavelandia mystica* (Pfeffer, 1883) a partir de reciente información. La variabilidad importante de su morfología de concha respectivamente a la dudosa identidad de esta especie en la literatura, es discutida, así como la comparación con otras especies. El rango de distribución de *C. mystica* se extiende desde el Océano Atlántico hasta el Caribe, en Suramérica.

KEY WORDS: cleavelandia, tunber, caribbean, variability, distribution, taxonomy.

MATERIALS AND METHODS Taxa, shells, specimens, distributions, nomenclature.

INTRODUCTION

The turrid genus *Cleavelandia* (Lamarck, 1811), known as ranging off West and South Africa, belongs to a subfamily Clavatulinae, considered by Pilsbry (1895: 417) as remaining "a rather widely differentiated group". The species attributed to *Cleavelandia* do not share well-defined features, and interpreting characteristics with allied genera often occurs, as far as shell morphology is concerned, as far as radulae are concerned (see Powell & Bouchet, 1985).

The genus *Cleavelandia* has never been revised in depth, and it might well be an really polyphyletic entity. As Kneller (1985: 42) suggested, "The genus *Cleavelandia*

as here distinguished, may have to be reconsidered when the West African species are better studied".

The deeper part of the Caribbean about the beginning of the Cretaceous probably does not contain the clavatuline clade sensu stricto (according to Kneller's treatment). The littoral Clavatulinae are probably the most variable in the Turrididae ever in West America, having some what anomalous in the fossil record, probably to extinction, some of the species

never ever been studied from the point of view of variability, and the fauna of individual species remains very incomplete for most of the taxa attributed to this genus.
